moving ideas

# FOR EVERY ONE

**moving  
ideas**

What do your customers expect from you and your furniture? Do they put the focus on function or design? Do they expect the highest quality, or a compromise between value and price? Is it even possible to reduce the varied group of people who buy your furniture to a common need? Because behind every person, there is an individual living and housing situation, a personal taste and furnishing style, which means that many specific demands are made on the furniture. We want to join forces with you on a quest – looking for opportunities to reach as many people as possible with well-thought-out furniture. Tailored to their individual requirements. With different focuses on function, design and cost. And we also want to start a conversation with you about your own requirements. Do you make mass-produced furniture? Or is every item unique? How do you plan, design, manufacture and market your furniture? Where can we support you with products, ideas and services? Let us create furniture together that increases your success, engages your customers and with sustainable quality, even benefits the environment. Let us join forces to create furniture for everybody.

# FOR FUNCTIONAL LIVING

For much of the day, life happens outside the home: at work or studying, meeting friends, shopping or going out. So it is all the more important to have a safe haven away from the hustle and bustle of everyday life, somewhere to feel at peace and secure. With furniture that makes spending precious time at home a real pleasure. With furniture that simply has really good, reliable functions. That can be used wherever needed, that makes full use of a small living space and also creates ample storage space – yet remains affordable. Furniture for your first home or shared apartment. If you find somewhere else to live, maybe you can take it with you when you move, so you can rely on furniture opening and closing with ease in your new home. Perhaps in a new living space and with a new purpose.

# FOR FUNCTIONAL LIVING

**Quality  
at a fair price** 

High-quality furniture does not have to cost a fortune. Even someone who is furnishing their first home wants quality furniture that is easy to use. Having the right fittings lays the basis for this.

 **Reliable  
function**

Opening and closing with ergonomic motion, but without any fuss. It's all about reliability, especially with the first furniture you buy. But there should be no lack of quality.

 **Modern  
design**

Unfussy, linear and modern: furniture can be reduced to the essentials and still look chic. Whether with or without handles is simply a matter of taste.

 **Create  
storage  
space**

Where do I put all my belongings? Storage space is often in short supply, especially in a city centre flat. Cleverly planned, practical furniture helps make room for the important things.

 **Urban  
and  
flexible**

Here today, gone tomorrow. If a move to a different part of town or to the nearest big city is on the cards, the furniture is important, it must work well without sacrificing quality or functionality. If furniture can be used for a long time, it is also sustainable.

# TANDEMBOX

## The classic solution to practical furniture

However much or little living space you have available TANDEMBOX always has the flexibility to create storage space. Whether the drawers are high or low, open or closed at the sides, have a round or rectangular gallery, the reliable box system is functional, linear and has genuine staying power. For decades, TANDEMBOX has proved its worth a million times over in a variety of furniture. And we won't stop there: we are constantly advancing the development of our entry-level box system.

Reliable function  
No gimmicks, just proven quality.  
TANDEMBOX is the solid foundation for  
a wide range of functional pull-out options.

# TANDEM 7/8 extension

Quality at a fair price

A 7/8 extension provides virtually the same, easy access as a full extension and at a lower cost – perfect for budget-conscious furnishing.

## Easy access included

There is no reason why everyday furniture use should not also be ergonomic. TANDEM with 7/8 extension allows cost-effective, easy access and an excellent view of items stored anywhere in the drawer. All items or provisions are kept nice and tidy and stay accessible. The wide TANDEM range has the right runner profile for any piece of furniture. Drawers are functional, yet easy to use, thanks to the feather-light glide and the choice between BLUMOTION and TIP-ON as integrated motion technologies.

### Easy access

AVENTOS gives those using the furniture full freedom of movement, keeping fronts well out of their way.

### Supreme opening and closing ease

Even large fronts can be opened easily with AVENTOS. The integrated soft-close mechanism ensures soft and effortless closing.

### Modern design

Lift systems not only protect storage items while still keeping them ergonomically accessible, they also have a tidy, modern look.

### Holds in any position required

The wall cabinet front will stay exactly where you want it to – and will always be within easy reach for closing.

### Handle-less fronts

Handle-less fronts are also an option with the mechanical opening support system TIP-ON.

## An inspiring range of lift systems

AVENTOS brings enhanced ease of use to wall cabinets. With fold up, swing up and over, lift up or pivot up motion technologies, the right option is always available, whichever living area you want to furnish. Doors should never get in the way, especially when there is not much space. With a multitude of applications and different motion technologies, there is scope for design to suit every living space and every budget.

### Also for small cabinets

Cabinets with a low internal depth can also be created with AVENTOS HK-XS.

# We build on proven technologies

If you want to concentrate on what's important for your home, you need fittings that are really good at their job. Just like CLIP top BLUMOTION hinges. The hinges open with minimal force, close softly and smoothly and last for the lifetime of the furniture. The wide range of hinges gives you the right solution for almost every application type – even for small living spaces.

### For a wide range of applications

The right solution for wood, glass or aluminium frame doors, thin doors, or thick doors.

### Inspiring quality of motion for every door

Thanks to the interplay of the closing mechanism and the damping effect, a gentle push is all that's required for closing.

### Handle-less fronts: thanks to TIP-ON for doors

Blum's TIP-ON motion technology allows you to implement fronts without handles.

### Urban and flexible

Remove the fronts, transport the furniture to its new home, clip in the fronts – and the quality of motion is the same as it always was. That's how easy it is to move furniture.

# CLIP top BLUMOTION

# CABINET SOLUTIONS

Storage space for everybody  
Making room for everyday items in previously unused locations is possible with Blum's solutions.

## SPACE TWIN

It is worth using even the smallest of gaps. Diagonally offset runners ensure stability and top-quality motion.

## Office Tower

Your entire home office in just one piece of furniture, with space for a laptop, office supplies and lots more. Castors turn the Office Tower into a mobile desk. Staggered drawers provide stability, even when open at the same time.

## Waste bin pull-out

The full extension makes it easy to throw away waste, empty and clean waste bins, and allows ergonomic access to the space under the sink.

Julia & Paul, Sophia & Marina

# FOR HARMONIOUS LIVING

Living together means making compromises. Because different people have their own, individual needs. Children love creative chaos when playing, while parents value being able to tidy up with minimal effort. Clever, well-thought-out furniture solutions ensure that while the concessions made to the people who share the house are big, the compromises stay small. This creates harmony in everyday family life. Opting for this furniture is a long-term decision, so the demands for quality and durability are correspondingly high. Values that are appreciated by everybody sharing a home – not just families, but also multi-generational households, or flatshares.

# FOR HARMONIOUS LIVING

## Taming the chaos

Everything immediately to hand and neatly tidied away just as quickly: furniture has to be a well-thought-out problem-solver and master of functionality.

## Storage space for everybody

A small, separate area for everything you need every day, with your personal favourites having their own space – when you share a household, everybody should have their own designated storage space.

## Functional? Multifunctional!

If everybody is to enjoy their furniture, as well as use it, then it must have many functions, be accessible to all, and be ergonomic.

## Timeless design

Different tastes that change only too quickly make furniture design challenging. Classic styles are often the smart way to go.

## Ready for everyday life

Furniture is opened and closed more often in everyday family life than in virtually any other situation. And children's hands pose the acid test. Good fittings can cope with this easily.

# MERIVOBX

**Modular with gallery**

Create a clean cut design with the use of exposed metal components.

**Modular with gallery and design element**

Countless combination options provide a high level of design freedom.

**Modular with BOXCOVER**

Create unique pull-outs – with interesting design elements.

**Modular with BOXCAP**

Simply clip on BOXCAP and you have a metal pull-out with closed sides.

**MERIVOBX pure**

MERIVOBX pure has continuous metal drawer sides, giving it a sleek closed look.

**Modular with BOXCAP F**

This option is ideal for tall applications, such as waste bin pull-outs.

**Taming the chaos**

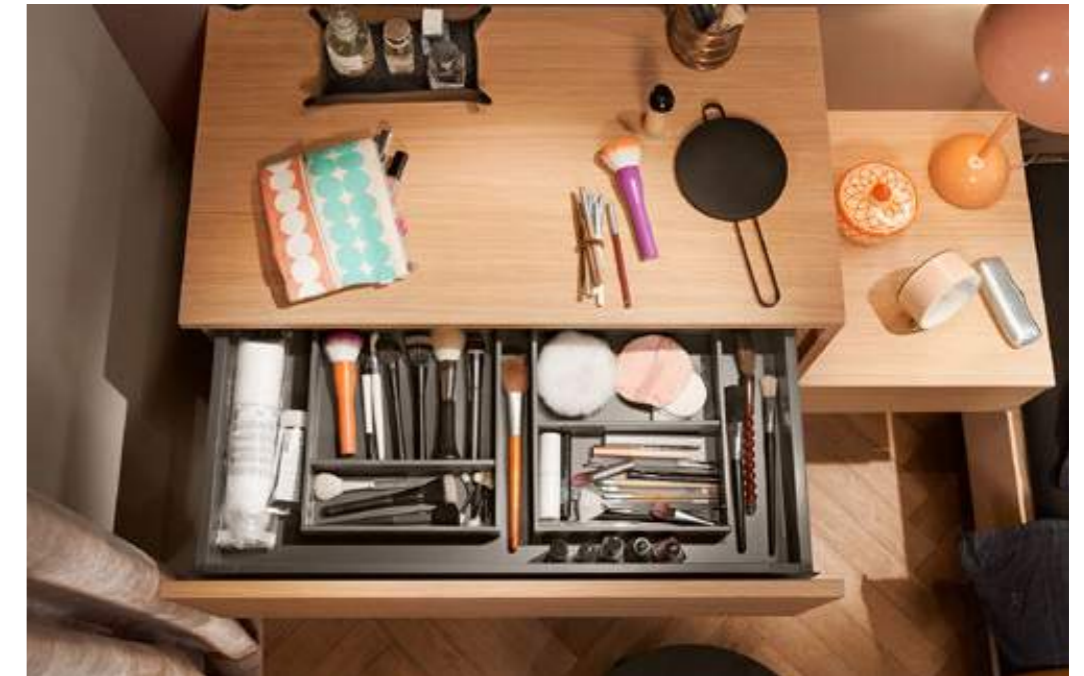

A mixed bag of toys? A fine collection of tableware? MERIVOBX can be precisely adapted to maximise storage space and customise organisation.

## The box platform: Something for everyone

Impressive functionality and characteristic design, but one thing above all: a platform that can be tailored to the needs of all those living under the same roof. Clear visibility and ergonomic access to storage items. Choose the right option, according to the area of application. MERIVOBX is a partner you can rely on, from entry level to premium class. For the lifetime of the furniture.

Ready for everyday life  
 Busy hands mean a lot of opening and closing for furniture. MERIVOBX passes the test of everyday life and still delivers a high level of convenience and perfect functionality, many years later.

## MERIVOBX for feel-good furniture

Safe havens are especially important in everyday family life. MERIVOBX modular with BOXCAP is the best way to furnish a study that is sometimes a creative playground for the children, and sometimes a home office. Pens, notepads and heavy folders are immediately to hand. Working from home is a cinch. MERIVOBX makes an impression in the vanity unit. It is not just the make-up that children put to the test. Be it beauty accessories or odds and ends, everything is always tidy and immediately to hand, thanks to the inner dividing system. The elegant frames of the AMBIA-LINE inner dividing system complement MERIVOBX perfectly.

# CABINET SOLUTIONS

Storage space for everybody  
The amazing SPACE TOWER storage space miracle can be a pantry, a beauty salon, a treasure chest for toys – multifunctional and adaptable to the living situation.

**SPACE STEP**  
The clever plinth solution creates additional storage space and gives even the smallest users easy access to higher storage levels.

**Sink cabinet**  
The u-shaped pull-out is the best way to utilise the available space and offers optimum access.

**SPACE TOWER**  
When the everyday routine is shared, there is not much time to spend in the bathroom and things are often somewhat chaotic. So it's good that there is room for everything in the SPACE TOWER.

## Re-thinking furniture

Some ideas only occur to you if you look calmly at the hustle and bustle of everyday family life. You then discover that you always need another pair of hands and that you are often in a rush – when fetching utensils and provisions just as much as when putting things away once the work is done. Creative cabinet solutions create added value.

### Versatile application

You sometimes have to think outside the box to create furniture that is even more functional. Turning the installation so that the CLIP top BLUMOTION hinges open inward, transforms the space behind the kitchen into a concealed pantry. The connecting door fits seamlessly into the look of the rest of the kitchen.

### Pull-out shelves are a clever helper

A surface that is there whenever you need it, and disappears again when you don't: pull-out shelves make housework far easier. This is made possible by Blum runners and the practical pull-out shelf lock. They stay secure in the extended position and are useful in the kitchen, the bathroom, or in different living areas and utility rooms.

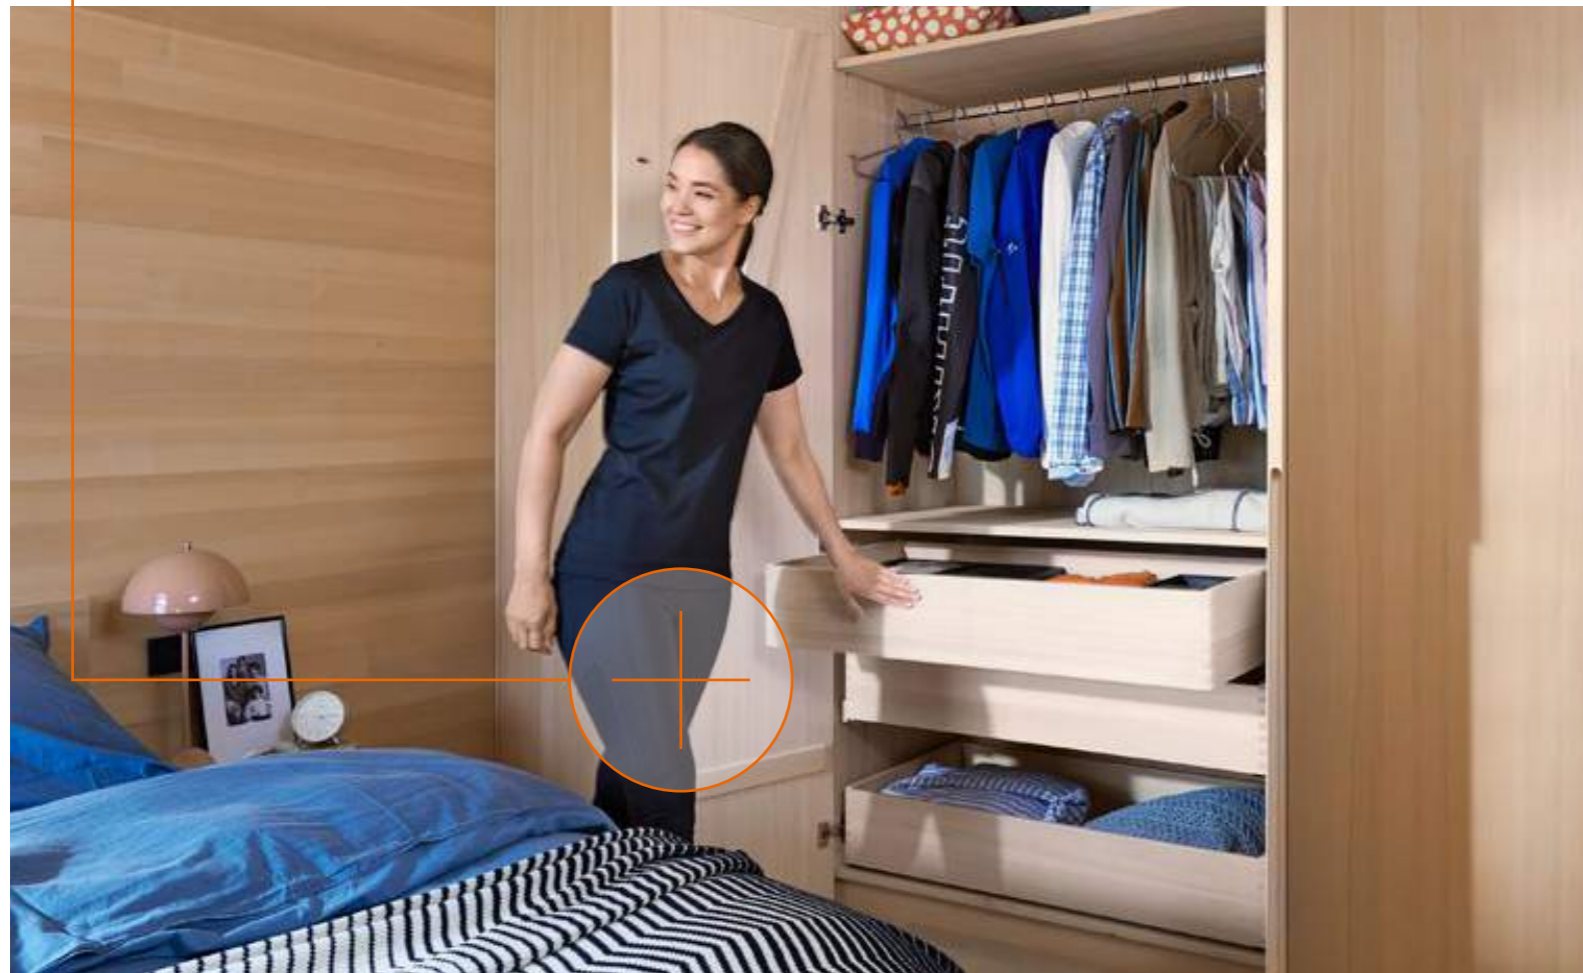

Functional? Multifunctional!

A pull-out shelf does not take up much room in the furniture, but it does provide an additional function. Thanks to the practical lock-open stop, the pull-out shelf stays where you want it to be.

# TANDEM full extension

Ready for everyday life

TANDEM is still extremely easy to use and reliable, even after plenty of motion. Of outstanding quality and with few components, the runner is reliable yet cost-effective.

## Integrated TIP-ON

### Full access, integrated convenience

The TANDEM full extension with the newly integrated TIP-ON opening support system ensures a better quality of living throughout the home. Everything must run like clockwork in the morning routine before work and school. It's good when the furniture also plays along, and the drawer seems to open by itself, wherever you tap it from. TANDEM's new synchronisation linkage ensures you have a large trigger range.

## Welcome to the family

Whether fold up, swing up and over, lift up or pivot up, the new AVENTOS top family is now more compact, modern and effective. The areas of application are many and diverse and thanks to the new, uniform design, all motion technologies can be easily combined. Storage space becomes accessible in every living area. Even when family life gets noisy, with the BLUMOTION soft-close mechanism, AVENTOS top lift systems close softly and effortlessly. With TIP-ON, opening is easy even without handles. Do you want enhanced ease of use? Then the SERVO-DRIVE electrical support system is the right choice.

Timeless design

Minimalist, linear, compact: even many years later, we still can't get enough of the AVENTOS top design. Cover caps in three colours give great design freedom.

# AVENTOS top

Functional? Multifunctional!

SERVO-DRIVE for AVENTOS top is especially convenient for the tallest in the household. Being able to open and close the cabinet with a tap of the finger is a blessing, if you are shorter.

#### AVENTOS HF top – bi-fold lift systems

The solution for high wall cabinets with bi-fold fronts. High cabinets create plenty of storage space up above. How about a movable shelf on the worktop as an appliance garage, to take electrical devices such as coffee machines which can be pulled out when in use?

#### AVENTOS HS top – up & over lift systems

The ideal fitting for large, one-part fronts. The up and over the cabinet swivel motion is a real experience. There is enough space left over for furniture designs with crown mouldings and cornices. The new generation does not need cross stabilisation.

#### AVENTOS HL top lift ups

Ideal for small, one-part fronts. The lift system opens up parallel to the cabinet. So even with a low installation height, you can get close to the furniture. AVENTOS HL top is suitable for creative applications, for skilfully making the home office disappear, for example.

#### AVENTOS HK top stay lifts

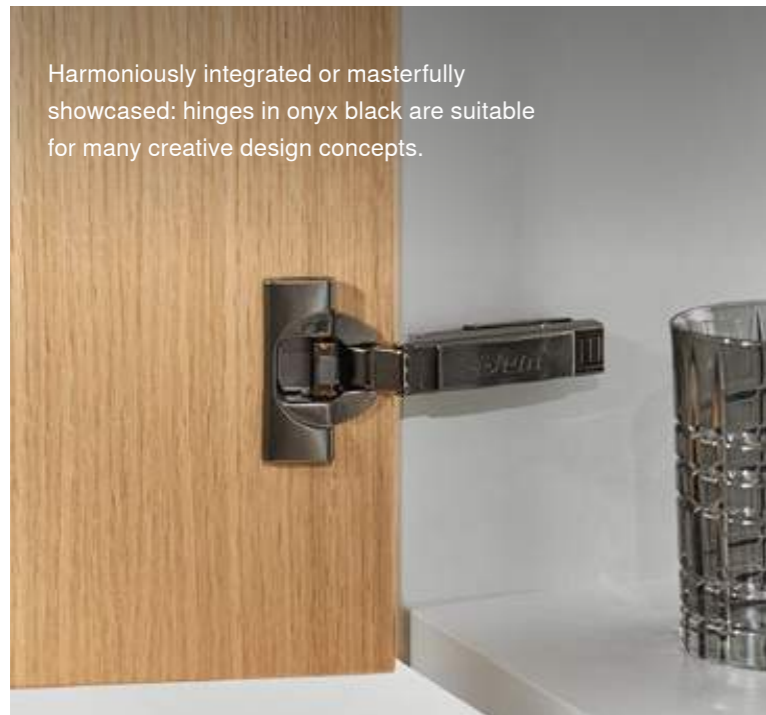

Ideal for one-part fronts. Small but strong, it is suitable for both small and large wall cabinets and is a good choice for higher storage levels, from hallways to fitted kitchen units. The integrated opening angle stop means that it can be used right up to the ceiling.

# Living with the family, living in style

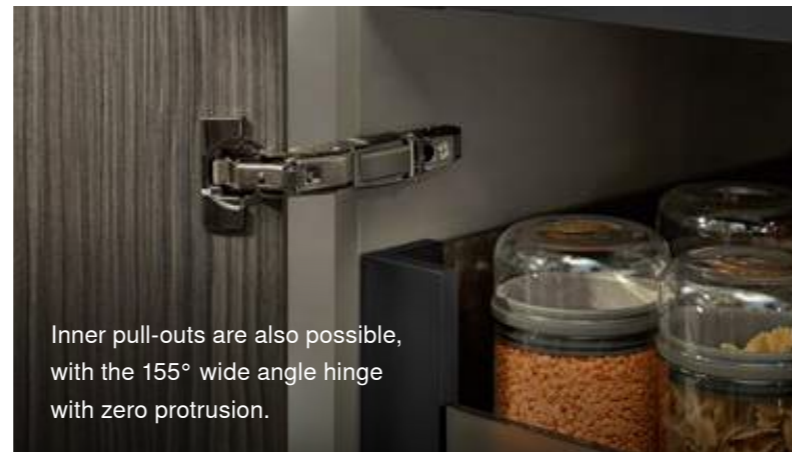

Who says that furniture for family life can't also be stylish? With a wide range of Blum hinges in onyx black, it is possible to find the right solution for almost every application type. Design ideas can be realised, from a tailor-made wall unit, to a practical tall cabinet.

Design  
Dark furniture radiates sleek elegance – inside and out. Hinges in onyx black blend discreetly into the furniture and are used to create visual impact. They give you greater design freedom, without compromising on form.

Harmoniously integrated or masterfully showcased: hinges in onyx black are suitable for many creative design concepts.

Inner pull-outs are also possible, with the 155° wide angle hinge with zero protrusion.

CLIP top in onyx black allows you to combine different materials such as aluminium and wood.

# Hinges in onyx black

# FOR INDIVIDUAL LIVING

Individuality is primarily the freedom to choose. It is about how we see the world and determine the course our lives will take, the career path we follow, and how we live. It has been a long time since furniture was just a necessity, a means to an end. Instead, it needs to reflect our personality and has a dual role to play: fulfilling individual needs for cosiness and comfort, and creating an ideal space for welcoming your guests. It has to work without a hitch, of course. But the art lies in turning a staple product into an individual piece of furniture in a stylish, high-quality design, with great attention to detail.

# FOR INDIVIDUAL LIVING

## Enduring value

Always expected, yet not taken for granted: high-quality furniture must be able to take heavy loads and last for a long time. Function plays the starring role, along with the right finishes.

## Exceptional design

In a stylish atmosphere, furniture must be representative, especially in open-plan living. The right fittings are essential for upmarket design.

## Bespoke style

Customer requirements are often individual, while furniture manufacturing is usually rational. The two can be reconciled if there is a lot of scope for customised design.

## Functionality with the wow effect

Furniture reaches new heights with surprising, cleverly hidden, or simply remarkable functions. It is a sign of success when you find yourself asking: what is lurking behind the next cabinet front?

## High-tech furniture

It's impossible to imagine everyday life without electrical devices. Modern furniture increasingly has to become a practical home for all kinds of gadgets. Or even offer digital functions.

# myLEGRABOX

## Expressive design

Following current trends and satisfying the desire for customisation: LEGRABOX opens up a wide range of design options. With exciting colour and material combinations, the box system gives high-quality furniture the finishing touch. The drawer sides are straight (inside and out) and impressively slim (just 12.8 mm), and are a canvas for your ideas.

### 2-shell drawer side design

The inner and outer drawer sides can be designed in different colours and materials.

Exceptional design  
Whether classically elegant or playfully rich in detail, LEGRABOX drawers make even the inside of your furniture eye-catching.

### Your creative playground

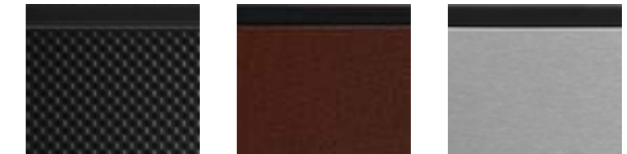

Design elements made from glass, wood, leather, stone, or any other material – LEGRABOX free does not limit your ideas.

Functionality with the wow effect  
Blum's designer box system not only looks amazing, the components are of such high quality that opening and closing the furniture is also an experience

**Harmonious and stylish**

These two features are united by combining the carbon look with the carbon black matt colour.

**A special look and feel with LEGRABOX special edition**

The colour coordinated LEGRABOX special edition collection features incredible drawer side looks based on the new carbon black matt colour.

**Effective contrast**

The mix of anti-fingerprint stainless steel on the outside and carbon black matt on the inside produces a designer look.

# Value inside and out

Something special happens when attractive design meets quality and function. The creative freedom and high-quality colours and finishes of LEGRABOX steal the show when it comes to creating unique furniture. But the underlying technology also knows how to enthrall. Fitted with the BLUMOTION S cabinet profile, LEGRABOX boasts minimal opening forces, a synchronised feather-light glide and gives you the flexibility to implement three different motion technologies.

**Shabby chic**

The noble rust structured finish gives furniture a special look and feel.

Bespoke style

If everything is perfectly harmonised on the outside, a stylish interior is a must. Individual drawer sides from LEGRABOX make this possible.

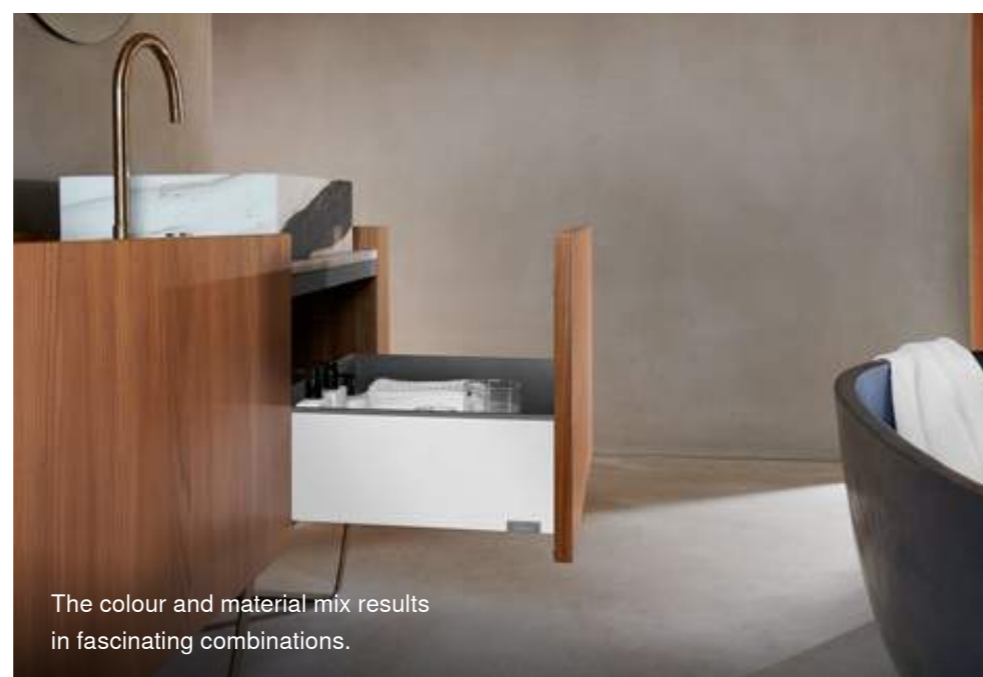

Custom partial embossing creates a design that can also be felt.

Drawer sides can be partially or fully printed to achieve a unique finish.

You can laser your own logo onto the anti-fingerprint stainless steel drawer sides.

The colour and material mix results in fascinating combinations.

## Furniture with character

The design of your home is a reflection of your personality. The highest level of furniture customisation is possible with LEGRABOX individual. Mix colours and materials, use printing, laser texturing and embossing to customise the drawer sides – the freedom is yours. Give free rein to your creativity.

# MOVENTO

## Enduring value

The MOVENTO runner system is tested to 100,000 opening and closing cycles in the Blum test lab. This ensures long-lasting quality and reliable function, even many years later.

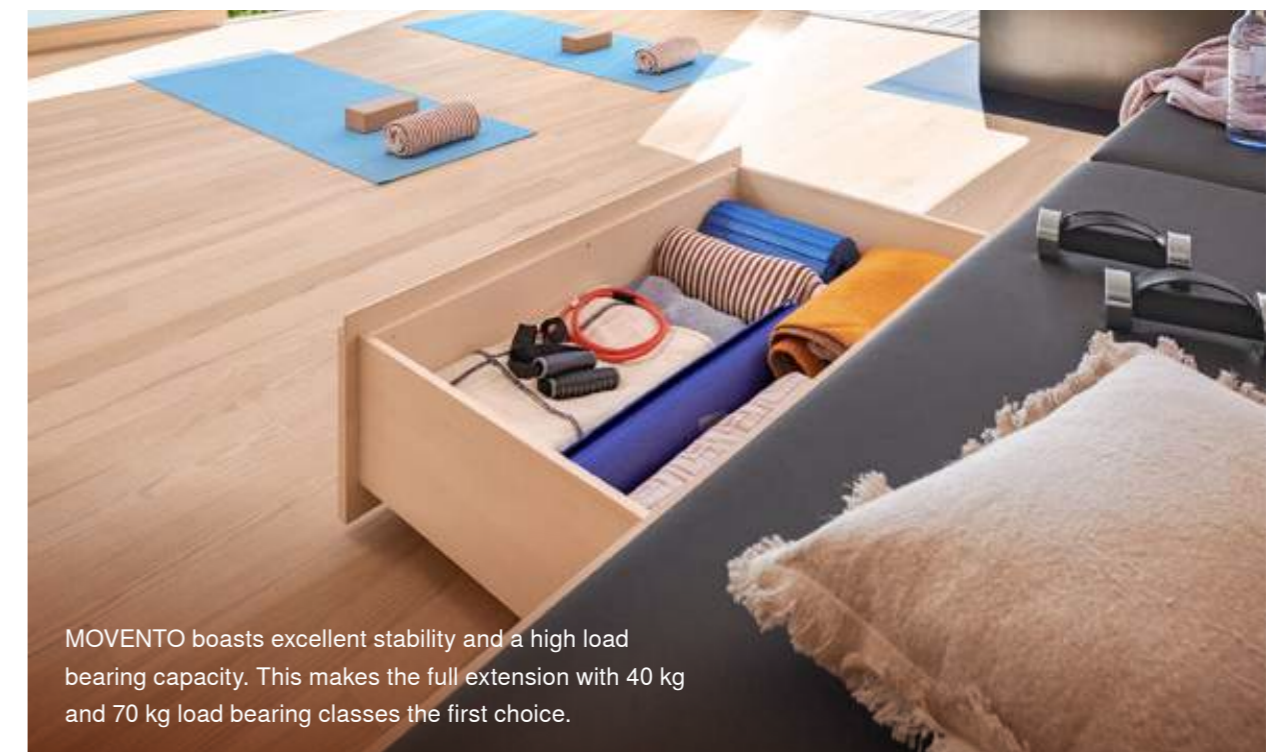

## Create your own home bar

No wobbling, no spills: the pull-out shelf lock in your home bar provides a secure hold, so there's nothing stopping you from mixing up a delicious cocktail.

## Durable, convenient and versatile

Drawers made from wood have an elegant, natural and warm appeal. With MOVENTO, they also open and close smoothly, silently and easily – thanks to the synchronised feather-light glide. Low-friction cylindrical nylon rollers ensure optimum weight distribution and a smooth running action.

MOVENTO boasts excellent stability and a high load bearing capacity. This makes the full extension with 40 kg and 70 kg load bearing classes the first choice.

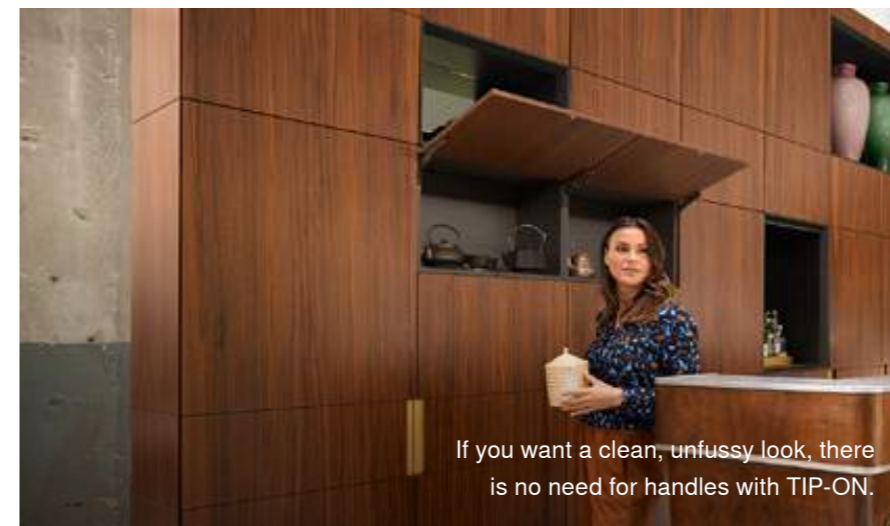

Functionality with the wow effect  
 Almost invisible, yet a master of functionality:  
 AVENTOS HKi also has a variable stop,  
 enhanced ease of use, an integrated opening  
 angle stop, and lots more.

## Purism without compromise

AVENTOS HKi takes furniture with stay lifts to the next level of design. The fittings stay invisible, even behind display cabinet fronts, so there is nothing to distract you from the collector's items and travel souvenirs. When you gaze into the open furniture, you also see something special – the onyx black levers are graceful yet durable. The lift mechanism is so narrow, it can be integrated into cabinet sides starting at just 16 mm.

# AVENTOS HKi

If you want a clean, unfussy look, there is no need for handles with TIP-ON.

### Full design freedom

Cabinets up to 1800 mm wide and 600 mm high with fronts with narrow or wide aluminium frames, wood, ceramics or other materials, are all possible.

# Materials for distinctive furniture

Nothing shapes the look of a piece of high-quality furniture more than its front. Which makes it all the more important to choose the right material. With EXPANDO T, the fixing system for thin fronts measuring 8 mm and above, you can also use very hard materials. Fine display cases and mirror cabinets are possible with CRISTALLO hinges. Each item of furniture is given its own identity.

Exceptional design  
 Mystical smoked glass? Lovely natural stone?  
 Fine ceramics? Exotic front materials lend a  
 unique character.

### Consistent design

EXPANDO T is suitable for lift systems, doors and pull-outs. This means that a living space can be fitted with thin fronts throughout. And always with tried and tested Blum functionality.

### Makes a strong impression

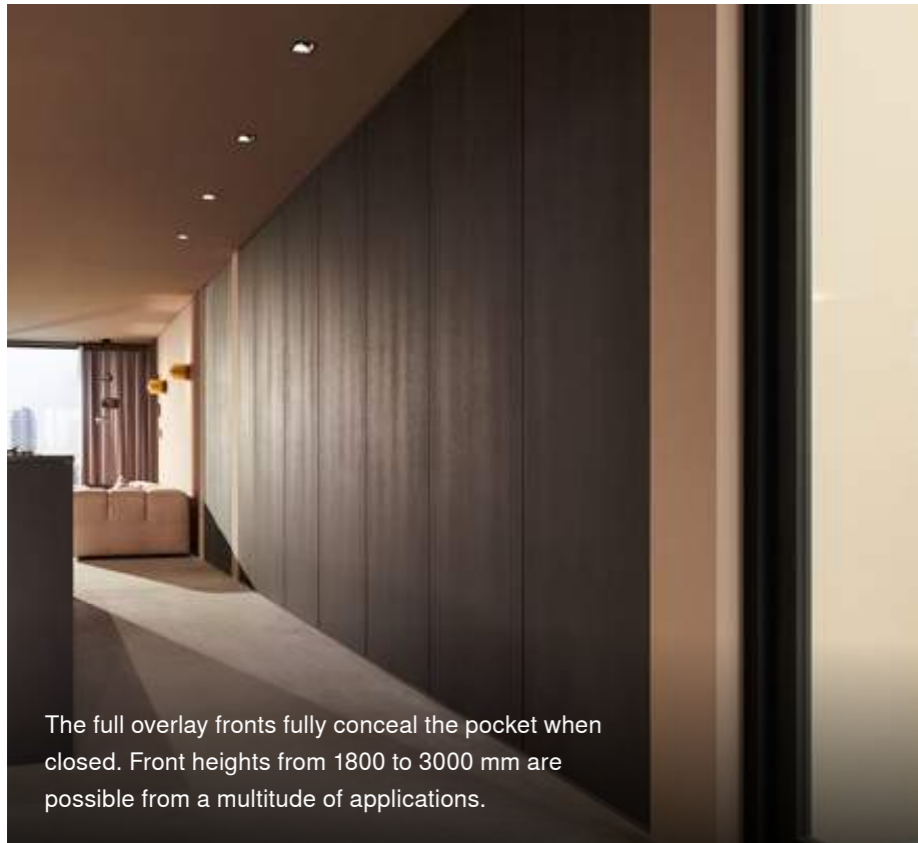

CLIP top BLUMOTION CRISTALLO is a combination of elegant design, innovative technology and enhanced ease of use. With glass and mirror door hinges, the BLUMOTION function ensures soft and effortless closing.

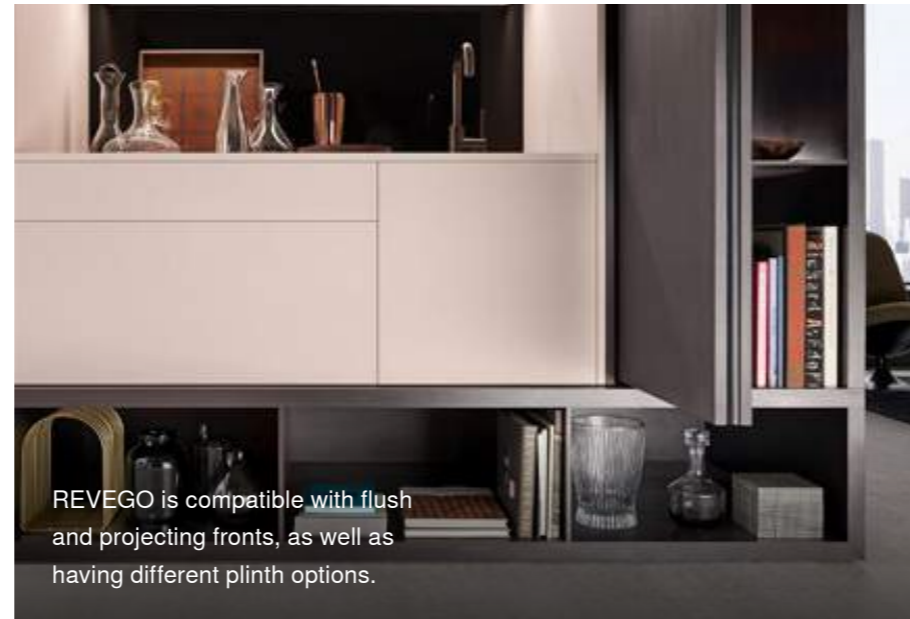

## Individual space concepts

It is possible to merge living areas, yet keep them separate when required, when the unwanted space can be cleverly hidden. The REVEGO pocket system gives maximum design freedom and brings new approaches to space planning. Whether for large or small spaces, the pocket door system with fully integrated technology allows you to open up complete living areas quickly and easily, or close them off discreetly.

Functionality with the wow effect  
Motion that continues to inspire:  
large fronts disappear with just one touch, as if by magic.

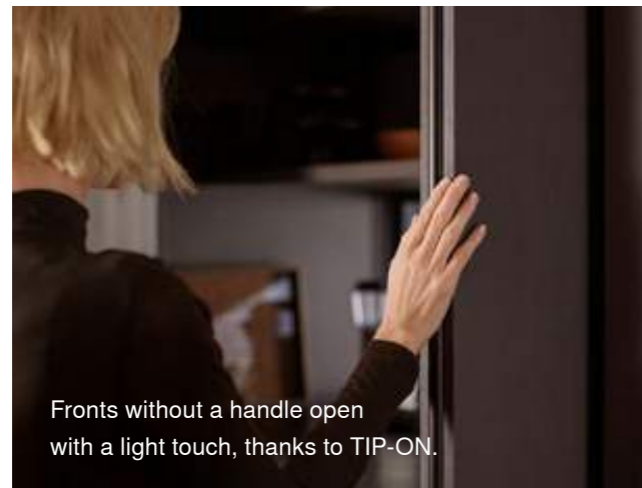

The full overlay fronts fully conceal the pocket when closed. Front heights from 1800 to 3000 mm are possible from a multitude of applications.

REVEGO is compatible with flush and projecting fronts, as well as having different plinth options.

Bespoke style  
However different the customer requirements might be, REVEGO offers a wide range of design options, from compact to ceiling high.

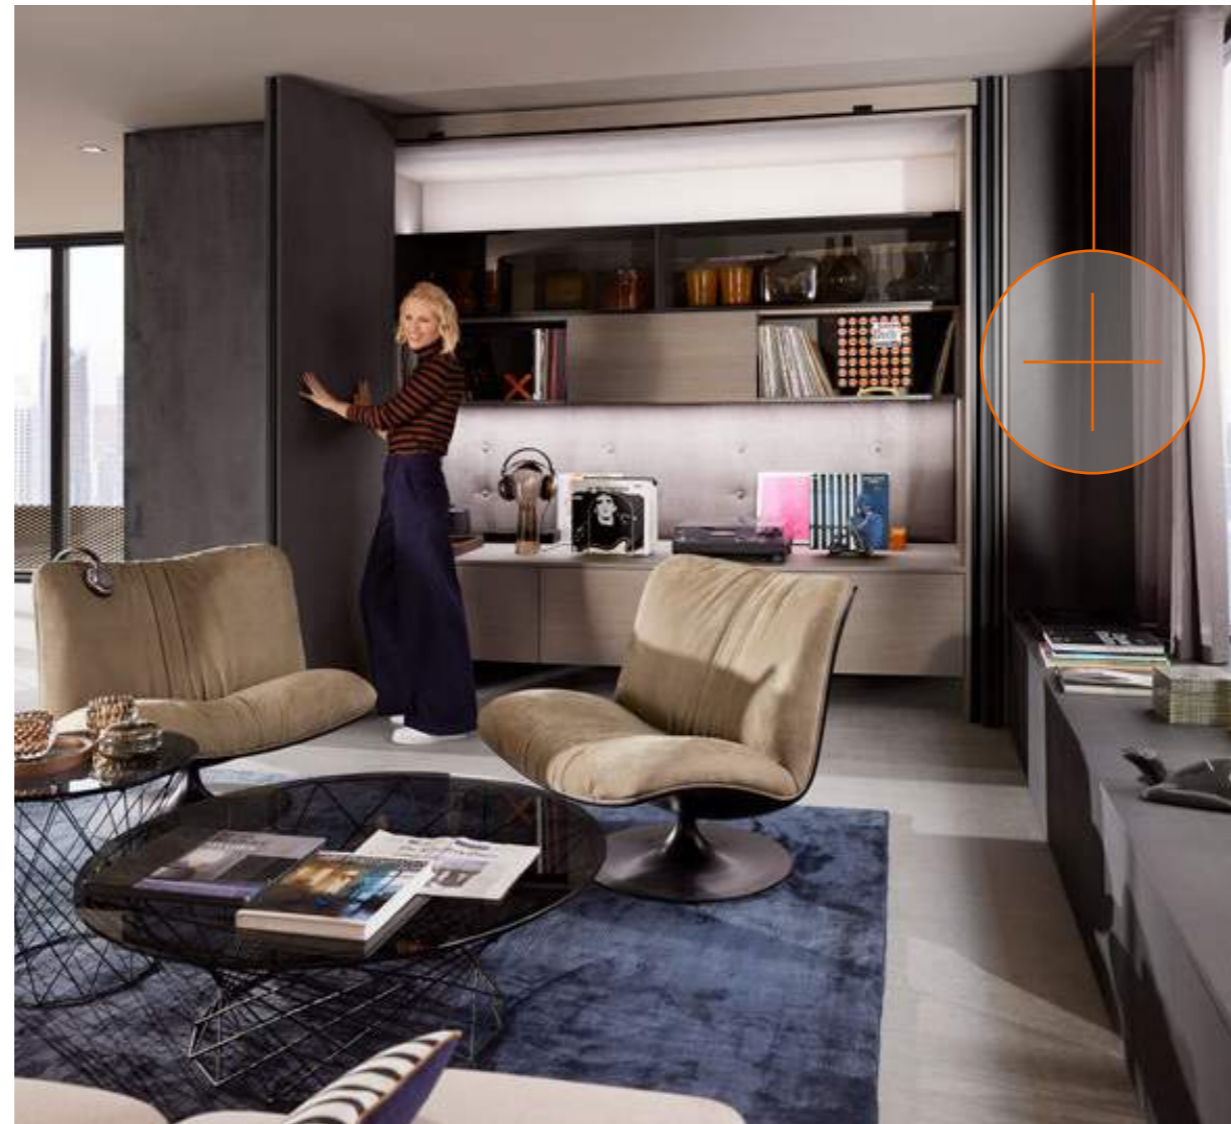

Fronts without a handle open with a light touch, thanks to TIP-ON.

The single doors of REVEGO uno can be combined with the double doors of REVEGO duo as desired, or used on their own.

# Hidden strengths

All the technology of this complex fittings solution is hidden inside. Options with internal design or walk-in applications such as dressing rooms are easy to implement with REVEGO.

Exceptional design  
 REVEGO emphasizes the stylish atmosphere and opens up totally new perspectives for upmarket furniture design.

## Versatile application

In modern living spaces, the boundaries between cooking, living and working zones are often blurred. This places high demands on creative space concepts. The ability to quickly open up complete living areas when you need them, and close them again when they are not in use helps to create a homely atmosphere.

### Easy planning, efficient installation

The standardised mounting width makes planning simple. REVEGO can be conveniently pre-assembled in the workshop and easily installed on site. Precise adjustment options guarantee a perfect result and an impressive look.

## Re-thinking furnishing

What if furniture could do more than just store things? Supply devices with electricity, or charge them, for example? Use light to make drawer interiors accessible, or contribute to the atmosphere of the living space with mood lighting? AMPEROS from Blum gives you the opportunity to re-think your furniture. You have two options: AMPEROS AC, an individual solution that can be retrofitted, and AMPEROS DC, a well-thought-out infrastructure solution.

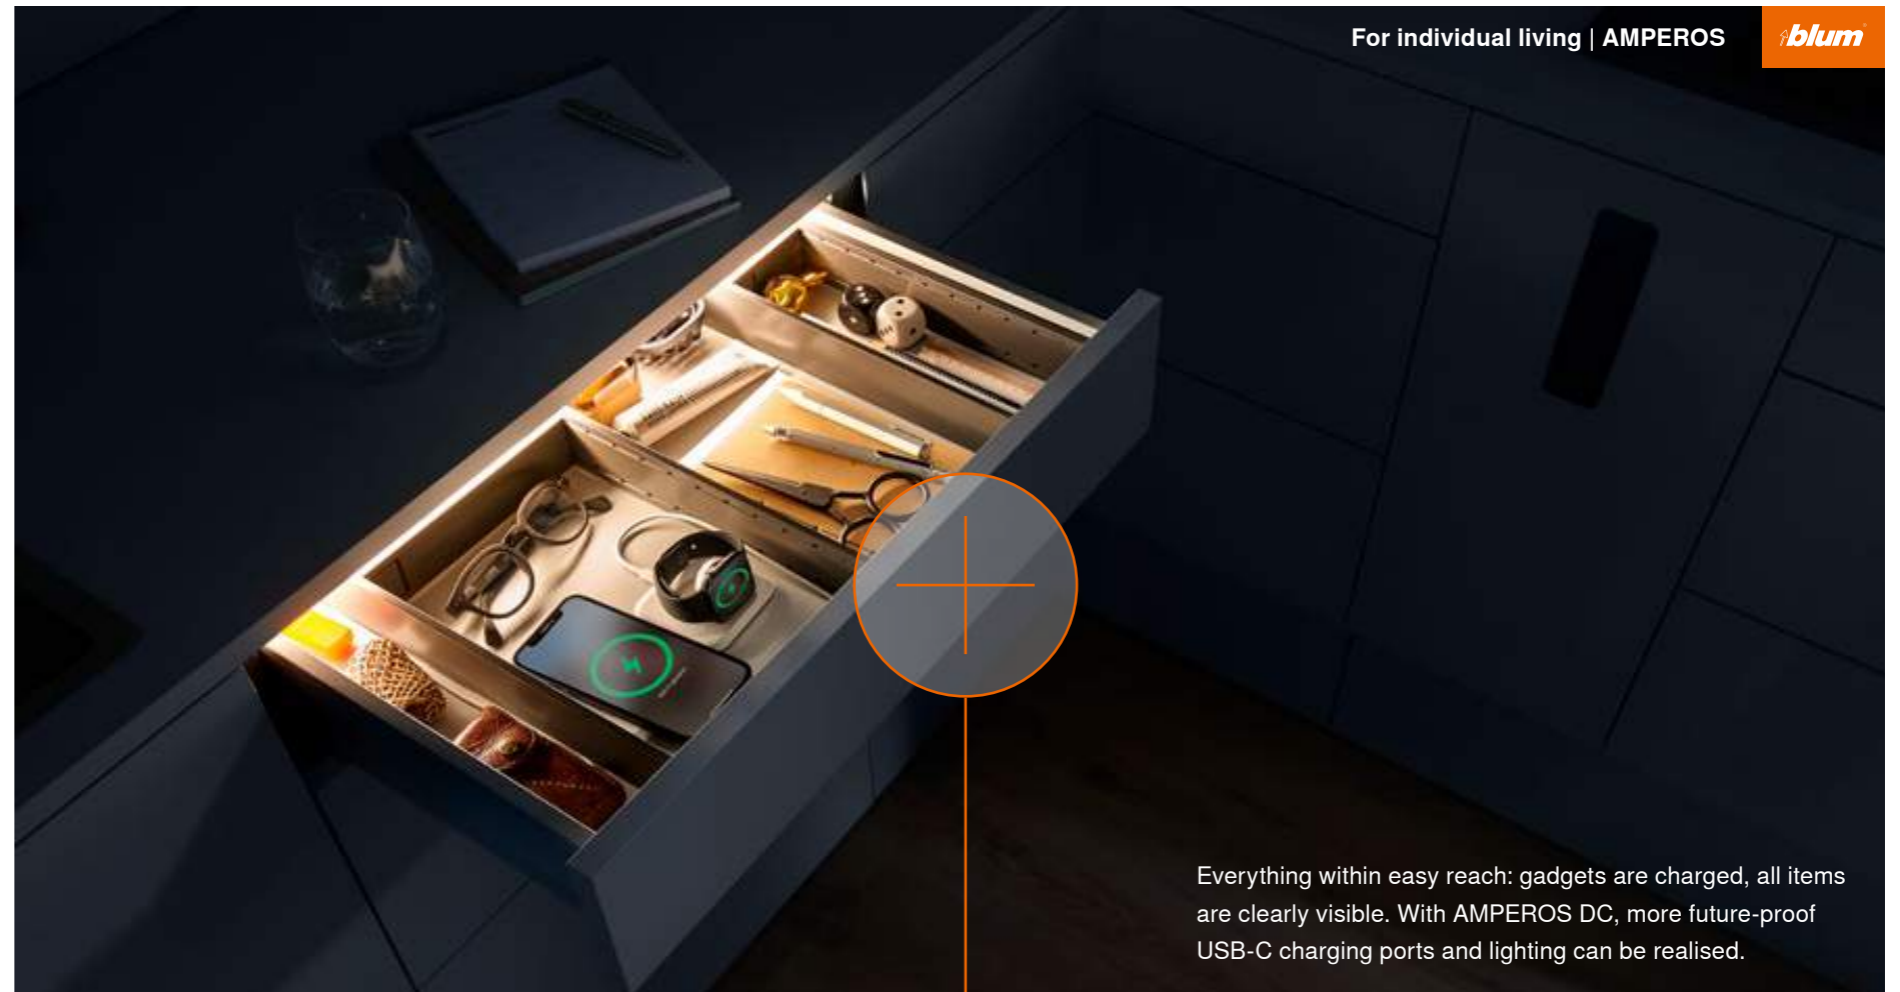

### Upgrading furniture

A power outlet with AMPEROS AC is easy to retrofit, as no additional space is required.

### Farewell to tangled cables

Both Blum solutions provide electricity to furniture without any visible cables.

Everything within easy reach: gadgets are charged, all items are clearly visible. With AMPEROS DC, more future-proof USB-C charging ports and lighting can be realised.

### High-tech furniture

Whether a toothbrush, hand mixer or smartwatch – the number of battery-operated devices is increasing in many areas of the home. AMPEROS creates additional charging options.

### Practical

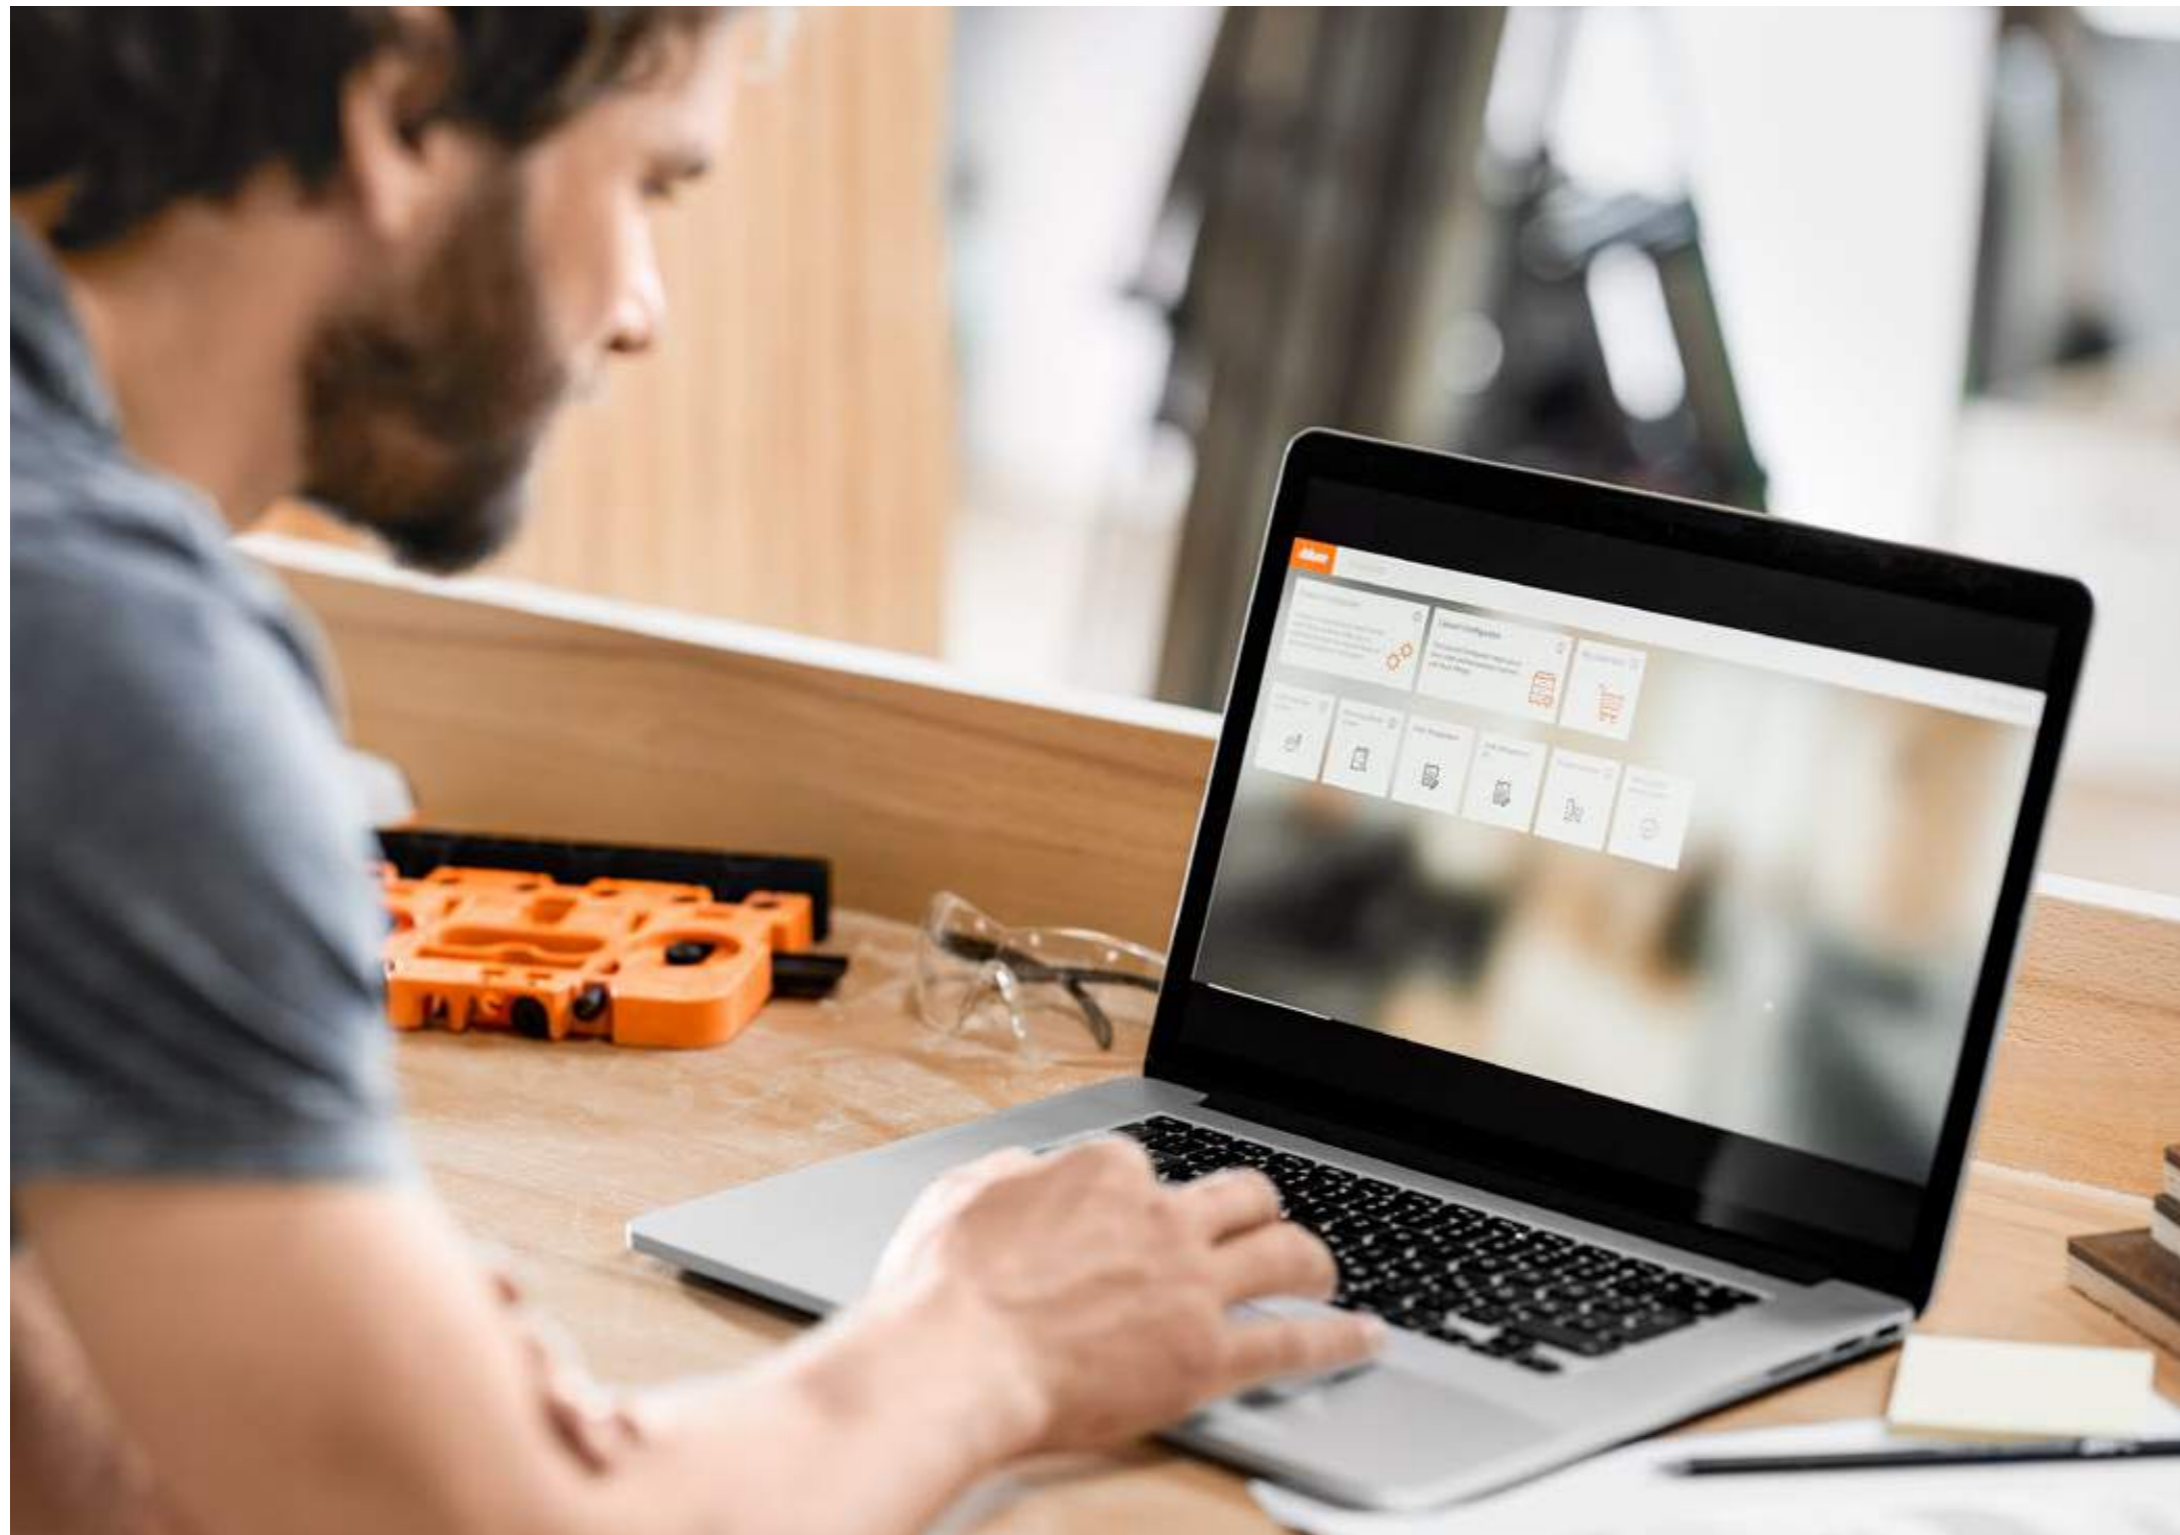

Cordless devices can be stored and charged in the same place with AMPEROS.

# FOR YOUR SUCCESS

To succeed as a furniture manufacturer, cabinet maker or distributor, you need more than good materials and fittings. It takes innovative ideas, forward planning and efficient processes. And one other crucial ingredient: suppliers who bring more to the table than just their products. Reliable partners for the challenges of day-to-day work. With personal dialogue characterised by mutual respect and inspiring new approaches, with digital services for different steps in the process, with help overcoming logistical problems, with service products to simplify manufacturing and assembly, and with marketing know-how. In short, with a key to a whole world of services.

# DIGITAL SERVICES

## Supporting you every step of the way

Whether you are a specialist manufacturer, mass-produce your furniture, deal in fittings, or program planning software – Blum E-SERVICES support you online, around the clock, throughout your process chain. Work with Blum products gets done more quickly and easily when configuration assistance is on offer, or the right product data is provided, for example. We give you the tools you need to manage your projects successfully.

Register now and find out more about our E-SERVICES:

[www.blum.com/e-services](http://www.blum.com/e-services)

**Product Configurator**

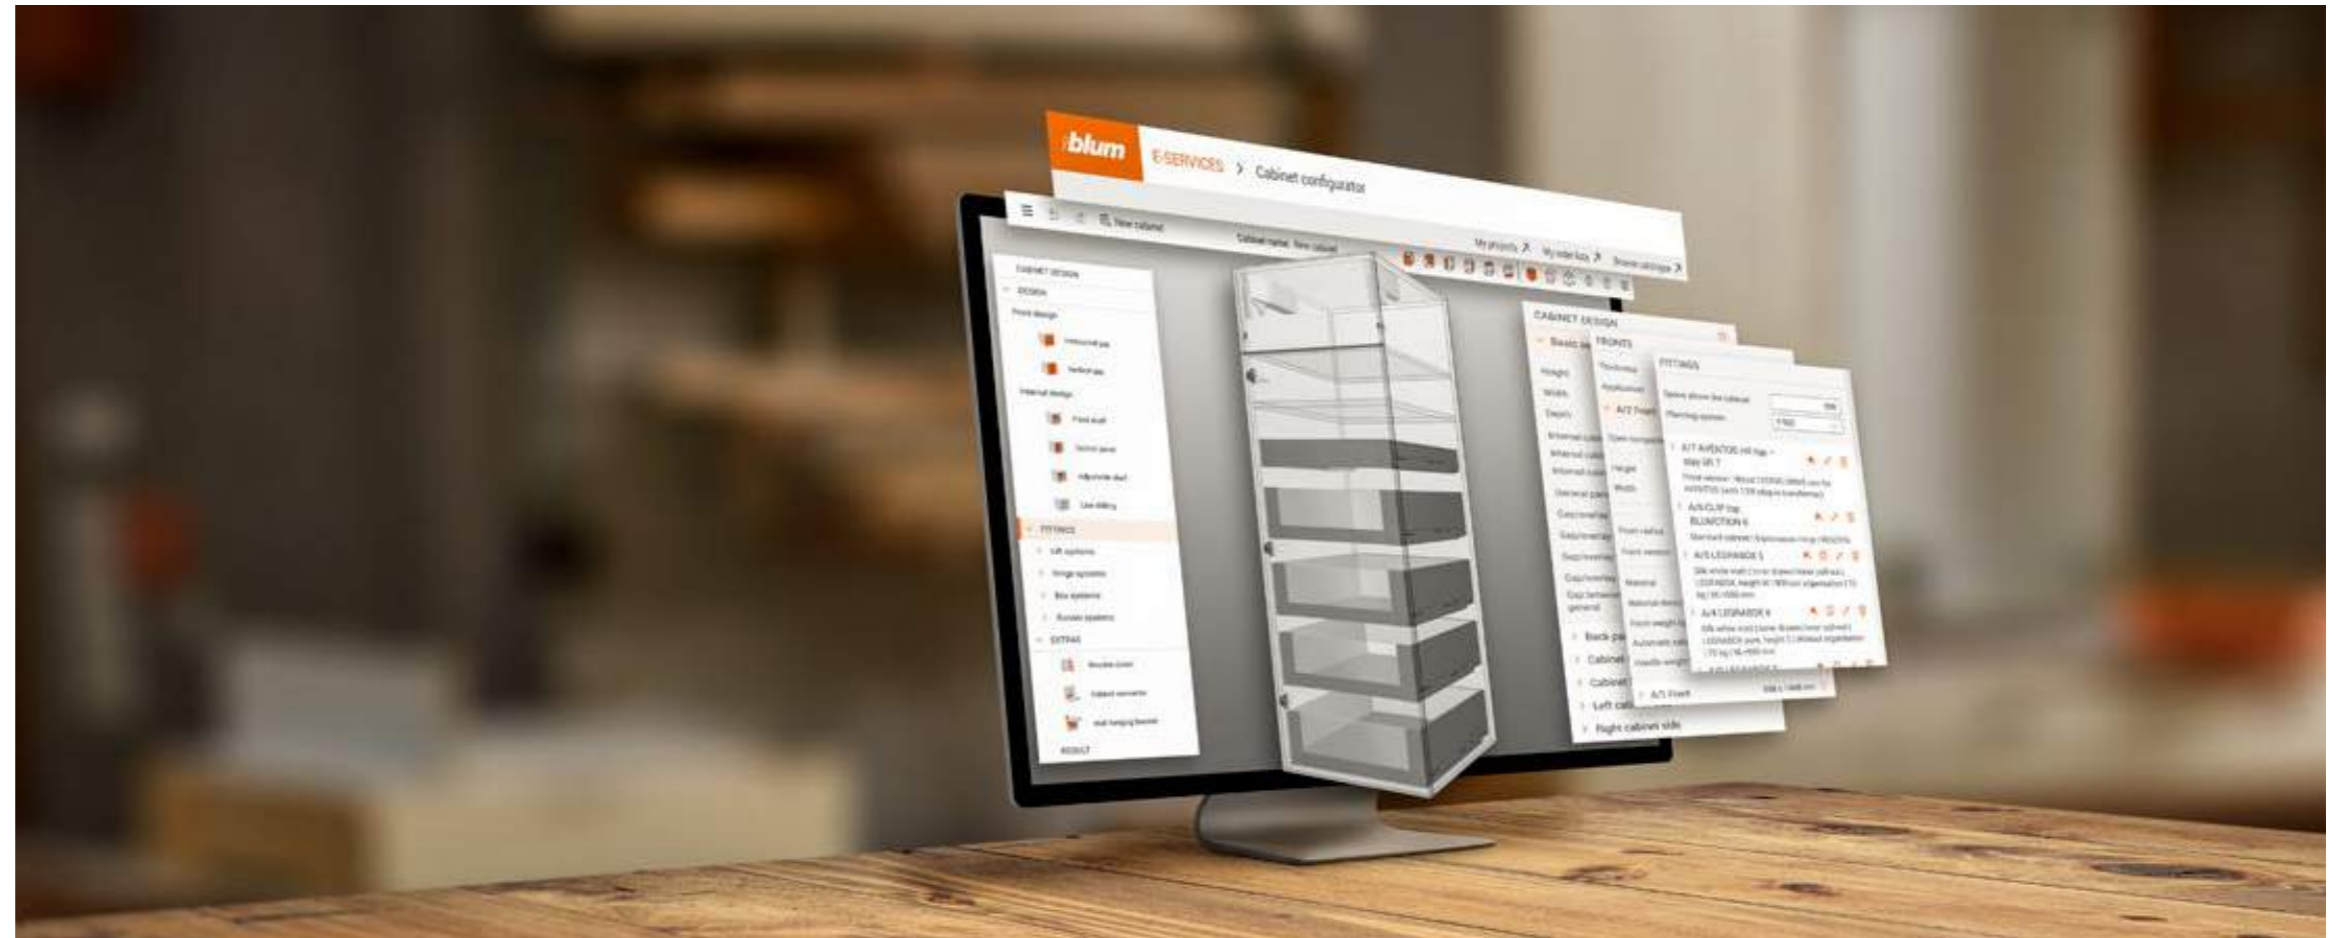

Find the right fittings solutions for your furniture projects quickly and easily. Transfer the complete parts list for entire projects directly to the web shop of selected distributors. The comprehensive planning results provide production drawings, as well as CAD, CAM and BXF data.

# DIGITAL SERVICES

**Services for distributors**

Data and services, tailored to your processes. We supply you with the structured data of Blum products as BMEcat. Blum Configurators can be integrated into your own web shop. Optimise order processes with our Order Management and EDI – reducing cost and effort.

**Cabinet Configurator**

Configure cabinets with Blum fittings in just a few clicks. The comprehensive planning results provide optimal support: during planning, designing, ordering and manufacturing.

**EASY ASSEMBLY app**

The EASY ASSEMBLY app answers any questions you might have about the assembly of Blum fittings. The app contains clickable installation instructions and assembly videos.

### BOXFIX plus

All BLUM box systems can be assembled with BOXFIX plus to save time. The required components can either be screwed together or assembled seamlessly and significantly faster using nail technology.

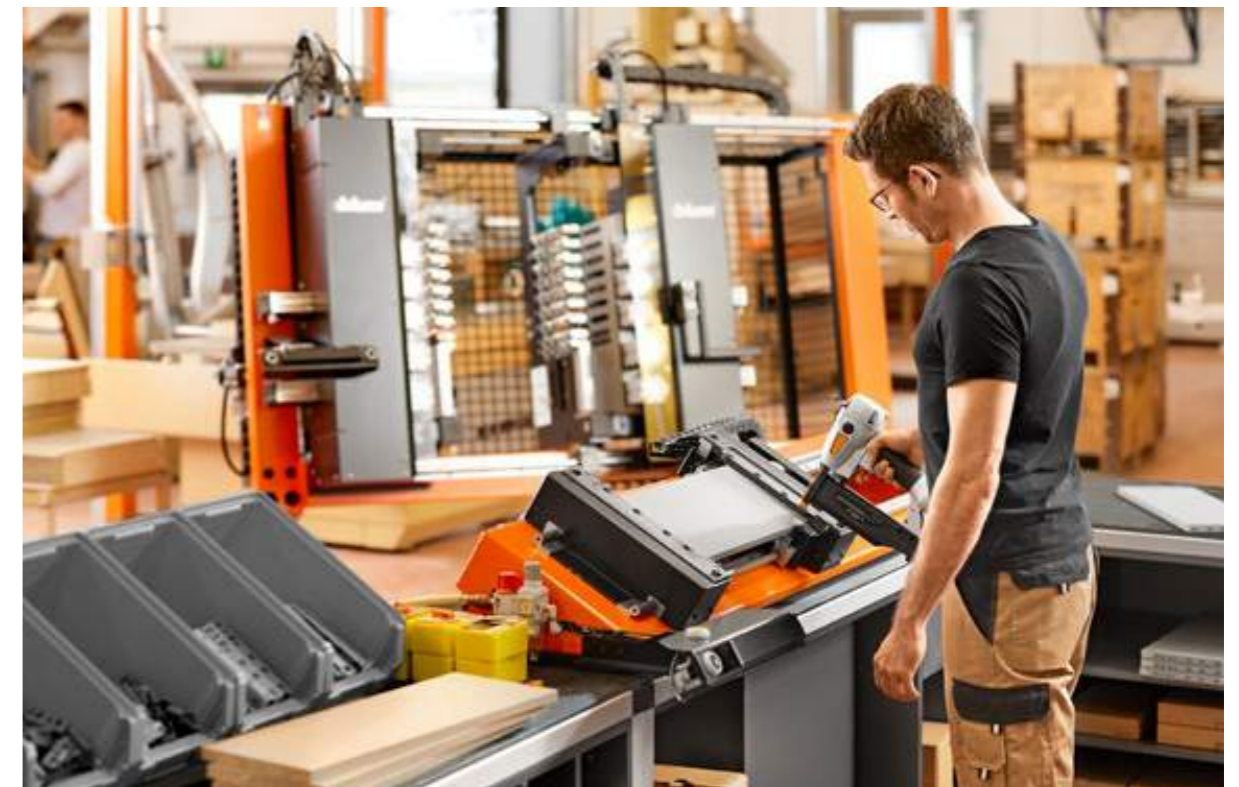

# Assembly devices

## Next generation drawer assembly

It is a big step towards success when the assembly processes run quickly and efficiently. So there is always a suitable package of assembly devices available for the fittings from Blum. We are widening the range of assembly aids on offer – for example, with new assembly devices with nail technology for the LEGRABOX, MERIVOBX and TANDEMBOX box systems. This results in form-fit, seamless connections between the wooden parts and the fittings – with a time saving of up to 40% compared to fixing with screws.

### BACKFIX

BACKFIX is the easy way to seamlessly and efficiently connect back fixings to the back panel using a pneumatic nail gun. The ideal complement to your OEM assembly devices.

# MINIPRESS top

## Optimised performance

The new EASYSTICK computer performs better, so than you can plan, move into position and process faster. It is accompanied by a larger, higher-resolution touchscreen.

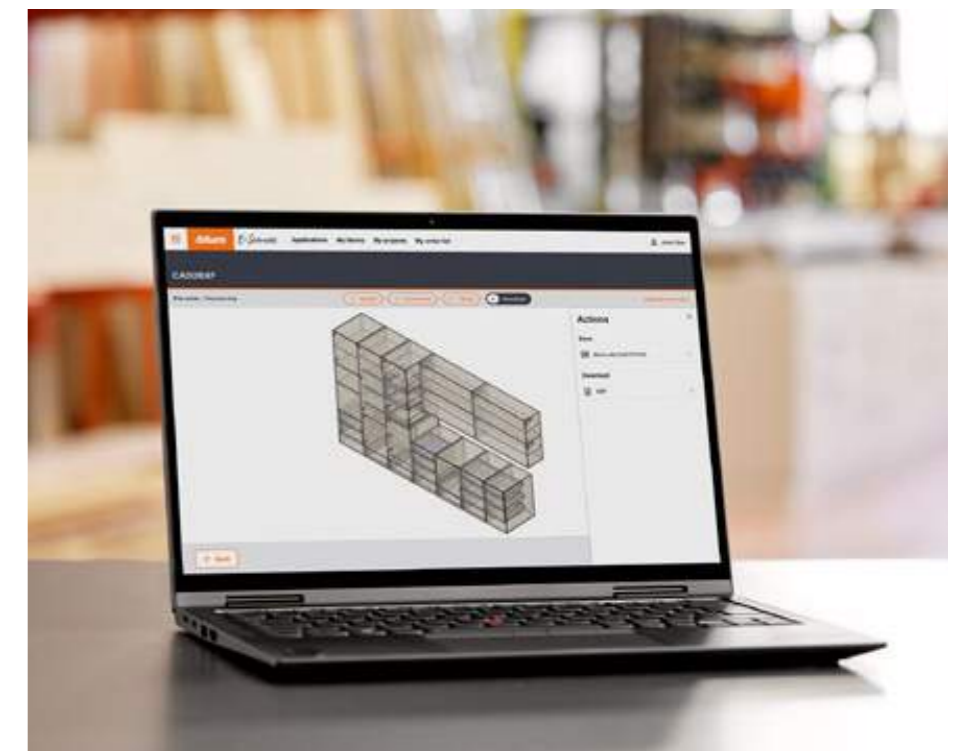

## The route to even better quality

MINIPRESS top with EASYSTICK bridges the gap between digital planning and specialist implementation. The manufacturing package is now being developed even further. A new, more powerful computer and a large, modern screen speed up the comprehensive drilling operations on cabinet, door and front. And with the new and exclusive CAD2BXF service, it is now also possible to manufacture designs from CAD software on the intelligent drilling and insertion machine.

## CAD data and EASYSTICK

CAD software and Blum services now go hand in hand. The new CAD2BXF service interprets your CAD designs and converts them into BXF data, so that they can be transferred to MINIPRESS top with EASYSTICK, and manufactured directly.

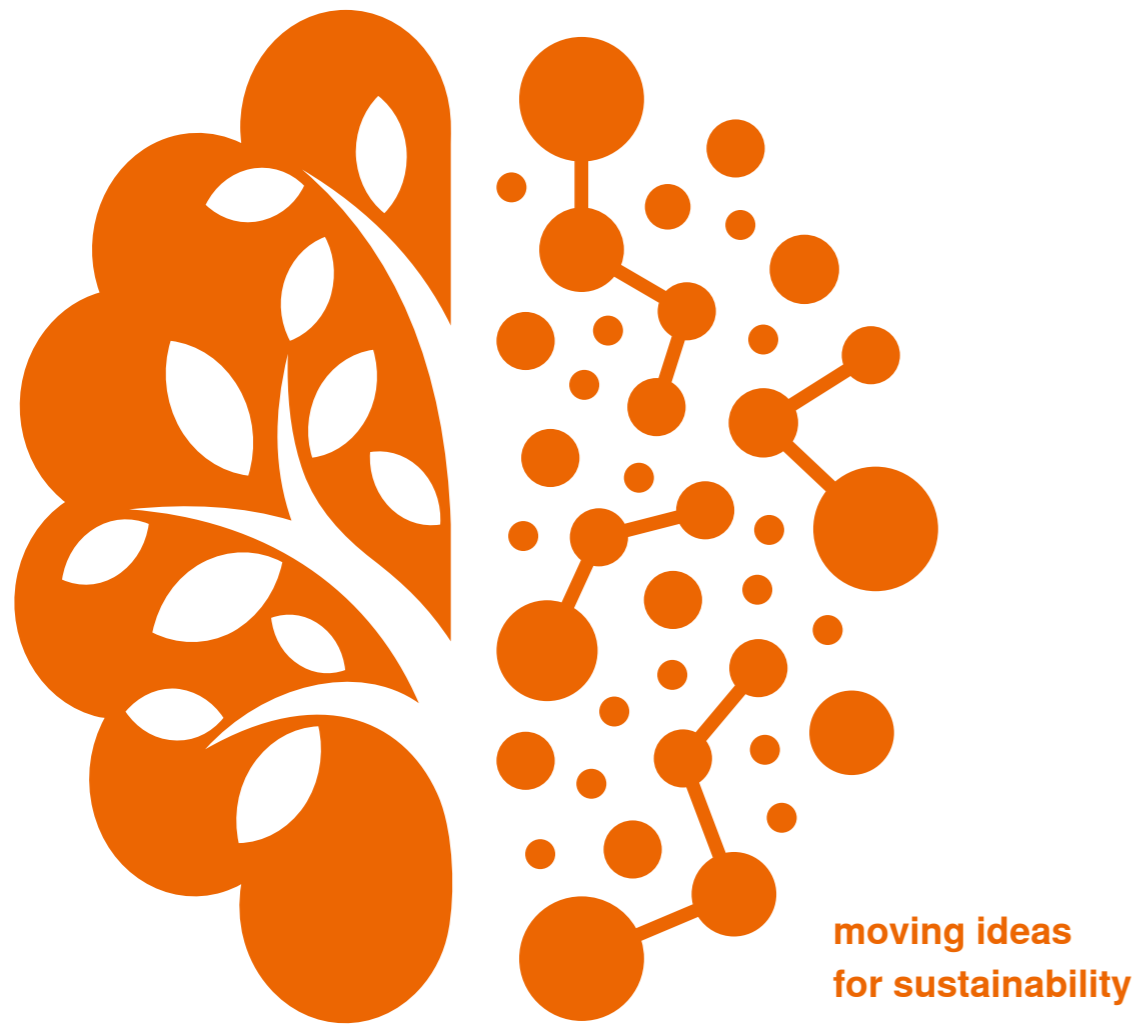

# FOR OUR FUTURE

A scenic view of a dam with a rocky riverbed in the foreground and mountains in the background. The dam is a long, dark structure with two prominent concrete pillars. The river flows through a rocky bed, creating white water rapids. The background features a dense forest of green trees and a large mountain peak under a blue sky with light clouds.

Who believes they can save the world alone? An impossible task on our own, but each and every one of us can play our part – no matter how small or large. Companies have a special responsibility, as business activities do have a major impact on people, the economy and the environment. It's challenging to see and accept this sense of duty, and deduce which specific steps to take. For example, basing your actions on the United Nation's 17 sustainable development goals and actively contributing to the 1.5 degree target. Even if it is a challenge, we believe: this is how it has to be.

# Sustainability

## Sustainable by conviction

Sustainability is not a switch you can simply flip, nor a short-term project that is quickly completed. It is a lasting commitment that needs perseverance and only works if you are acting out of conviction. And it starts with ideas of how things can be done differently and better. We have therefore made sustainability an important element of our company strategy.

Our core business activities are geared to high-quality and long-lasting products that are tailored to different areas of application. It is second nature to us to adopt a resource-saving approach and avoid any negative impact on our planet's ecosystem, or to compensate in some way, if this cannot be avoided.

The pursuit of greater sustainability results in new opportunities for products, services and business models. We constantly assess the possible potential in innovations.

The health and safety of everyone around us are of utmost importance to us. We show respect towards the people and organisations with which we are associated.

Responsible growth secures the long-term health of the company. It is important to take both ecological and social aspects of sustainability into account, even with investment decisions.

# Step by step to greater sustainability

### Contributing to sustainability

Since 2021, Blum Austria has offered a wide-ranging package of options to ensure that even fewer employees need to commute by car. On peak days, almost 50% of our workforce now gets to work sustainably.

### Raw materials for tomorrow

Steel is the main raw material used in our products. So we are especially careful to separate the steel by type, so that it can be reprocessed, and after recycling, returned to our production lines.

### Ecological and regional

At Blum Austria, our electricity comes 100% from hydropower. By making this change, we were able to reduce our carbon footprint by more than 40%.

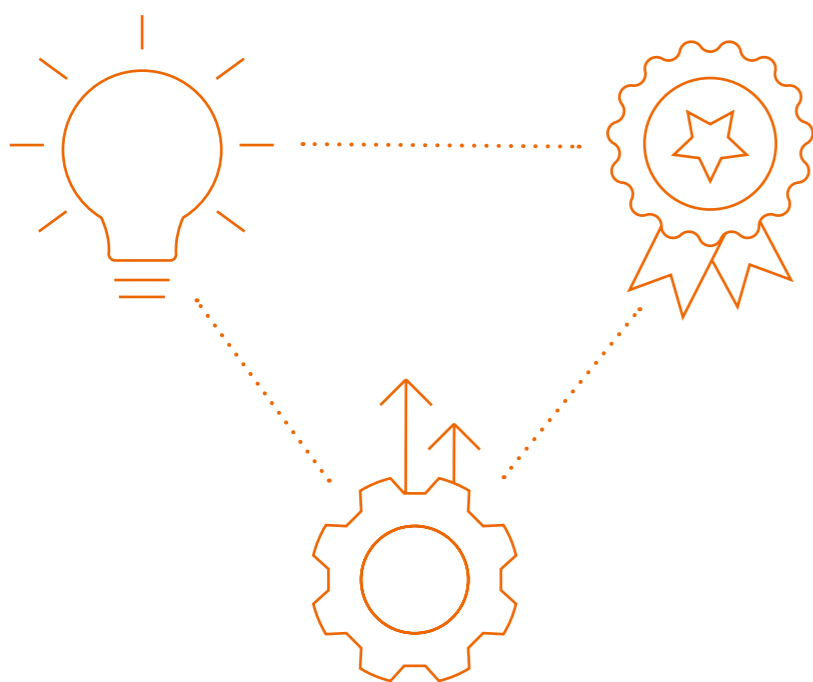

### Investment in the future

We have been providing training in what is now 11 technical professions for more than 50 years.

# Product sustainability

Innovation, quality standards and optimisation are our top priority when it comes to using resources. This approach extends from products and manufacturing processes, to the use of resources, to closing cycles. We lay the basis for the efficient use of raw materials in our product development. The entire life cycle, from procurement to recycling the whole product, if possible, is subsequently analysed to minimise the impact on the environment. Energy and environmental demands are already made on each product in the project development phase.

# moving ideas

We believe that ideas can move the world. We offer innovative fittings, inspiring furniture concepts and appropriate services so that you can turn your creative ideas into reality. We are driven by your needs, international trends and our shared vision of a better quality of living. Let us work together to create moving ideas.

## Quality of living

We would like you to enjoy greater convenience and functionality when using furniture.

## Product range

Everything from a single source: our wide range of products allows you to keep up with today's and tomorrow's trends.

## Inspiration

We monitor global trends and strive to create the solutions of tomorrow. We like to share our insights with you.

## Innovation

We stay in motion. Curiosity and pioneering spirit drive us to develop new products and services for you.

## Services

We support your daily operations with customised services tailored to your processes.

## Quality

We continuously strive to improve our products, services and ourselves.

## Trust

We take responsibility for partnerships, our employees, society and the environment.

Julius Blum started our journey in 1952 with horseshoe studs. Today we supply innovative fittings to customers in over 120 countries.
