moving ideas

We believe that ideas can move the world

This is why we are showcasing Blum's latest innovations once again so you can realise your furniture concepts. Our functional and easy-to-use fittings connect fronts, pull-outs and doors to cabinets. But to us, "connect" means more than just connecting components. We want to connect your creative ideas and our fittings solutions. We want to connect the learnings of the past and the trends of the future. And we want to connect our broad range of products and services to make your job easier. Let's create moving ideas together.

No matter if you're in a house or an apartment, whether it is big or small – we have inspiring cabinet solutions for a variety of different living areas. In addition, we offer practical information around ergonomics, storage maximisation, top quality motion and design.

Let's share our experiences and develop ideas together so that we can put an even stronger focus on practical cabinet solutions in the future.

Sink cabinet

Why not maximise under-sink storage space? This U-shaped pull-out is also ideal for bathrooms.

SPACE TOWER

The spacious SPACE TOWER larder unit provides easy access to all items stored in a kitchen.

SPACE STEP

The SPACE STEP plinth solution creates additional storage space and provides ergonomic access to higher storage levels throughout the home.

SPACE TWIN

The narrow cabinet enables made-to-measure solutions and creates storage in unexpected places.

Facts

- Our CLIP top BLUMOTION hinge consists of 58 component parts and is made on fully-automated, high-precision production lines. To deliver top quality motion to every piece of furniture.
- Up to 250 kg of items are kept on average in the kitchen. That is why it is so important to make full use of the space available.
- Fine furniture is furniture that opens with ease and closes softly and effortlessly. In every living area.

REVEGO

The new REVEGO pocket system opens up and closes off your home office within seconds. The same applies to functional spaces in other rooms.

Pull-out shelf

This clever solution is not only a real eye-catcher in the utility room. The practical shelf with a lock-open stop makes household chores child's play.

Ergonomics

Let's make a comparison: Doors or drawers in base units? What's most important is easy access and clear visibility.

Design

Innovative fittings support your design ideas and enable you to implement the latest furniture trends.

Lift systems

New concepts for more freedom of movement

There are many ways to improve your customers' quality of living. The comprehensive range of AVENTOS lift systems opens up a whole new world of design possibilities. Whether they fold up, swing up and over, lift or pivot up – lift systems add visual impact to any space. Product innovation AVENTOS HKi, for example, is seamlessly integrated in the cabinet side. And the compact design of AVENTOS HK top will now be possible for all lift system types, opening up numerous new applications throughout the home.

Freedom of movement

Freedom of movement and easy access to cabinet contents are a great advantage. Thanks to AVENTOS, fronts glide up and out of the way and can stay open while you are working in the kitchen.

Design possibilities

Wood or stone fronts, wide or narrow aluminium frames, thin fronts of 8 mm or more – AVENTOS enables you to implement many different design ideas.

Easy opening and closing

SERVO-DRIVE delivers supreme opening and closing ease to wall cabinets. Alternatively, you can use the TIP-ON mechanical opening support system for handle-less fronts.

Variable stop

The front is always within easy reach for closing thanks to the variable stop. It is not necessary to open the cabinet completely.

Harmonious design of wall cabinets and base units

Thanks to AVENTOS, you can also implement extra wide wall cabinets. This allows you to harmonise the design and gap layout of overhead cupboards and base units.

New cover cap design for AVENTOS HF, HS and HL

Cover caps for AVENTOS HF, HS and HL are now available in a linear design to match those of AVENTOS HK top and AVENTOS HK-S so that you can create a coherent look in all living areas.

Cover caps come in silk white, light grey and dark grey. In future, you will be able to use the same branding element for all lift system types.

AVENTOS HKi

The AVENTOS HKi stay lift is integrated in the cabinet side. The product innovation not only inspires with top quality design and power setting from the front. It naturally also boasts the top quality motion and convenience you expect of AVENTOS. The onyx black fitting merges beautifully with the interior and is therefore ideal for display cabinets.

AVENTOS top family

Reduced to the essentials

AVENTOS HK top will be complemented by a bi-fold, lift up and up-and-over model to create a whole AVENTOS top family. The compact design blends in discretely with tall units and wall cabinets. Many integrated features make assembly and installation especially easy. There are two lift mechanism fixing methods. You can either use an integrated positioning system or pre-mounted system screws.

SERVO-DRIVE: Easy tool-free assembly with guided start-up using colour signals

Sleek and linear design:
Same cover cap for
AVENTOS HF top, HS top and HL top

Compact range:
Fewer types of lift mechanisms,
levers and cover caps

Integrated safety mechanism

Setting from the front

Minimal opening forces

Two lift mechanism fixing methods:
Pre-mounted system screws or chipboard
screws and positioning system

AVENTOS HF top

Additional information for bi-fold lift systems:

Cabinet height up to 1200 mm, fewer types of lift mechanisms and levers, integrated opening angle stop, same lift mechanism position, same position on the front.

AVENTOS HL top

Additional information for lift up systems:

Fewer types of lift mechanisms and levers because levers are symmetrical.

Lift systems | AVENTOS top

AVENTOS HS top

Additional information for up and over lift systems:

No cross stabilisation, fewer types of lift mechanisms and levers because levers are symmetrical – also applies to SERVO-DRIVE.

AVENTOS HK top

Additional information for stay lifts:
Integrated opening angle stop.
Already available.

Hinge systems

Motion is not just about OPENING and CLOSING doors

It is our motivation to provide fittings that meet customers' needs. That is why the last 57 years have seen constant developments. Just like those to our range of CLIP top BLUMOTION hinges. They impress with their compact size, elegant design, high stability and top quality. Integrated soft-close BLUMOTION ensures that furniture doors close softly and effortlessly. The wide range of hinges gives you the right solution for almost every application. From wide angle and aluminium frame to mirror cabinets. From especially thin doors to especially thick ones. We also offer our hinges in a dark, onyx black finish.

CLIP top BLUMOTION for thin doors

Thanks to the EXPANDO T fixing system, CLIP top BLUMOTION can also be used for thin doors.

CLIP top BLUMOTION CRISTALLO

The CLIP top BLUMOTION CRISTALLO hinge is very stable and has been designed especially for glass and mirror doors.

CLIP top BLUMOTION 155°

The wide angle hinge with zero protrusion delivers top quality motion to cabinets with a large opening angle and inner drawers.

Box systems

Developing for the future

Box systems

A box system for every requirement? You've got it with Blum. You can choose between TANDEMBOX, MERIVOBX and LEGRABOX to suit your needs. We have simplified and at the same time optimised our TANDEMBOX range especially for our industrial customers. MERIVOBX is a new box platform for your ideas. And LEGRABOX offers a wide variety of design possibilities, enabling you to implement your ideas and create bespoke furniture and living spaces. Despite their diversity, they all have one thing in common: the quality you have come to expect from Blum.

TANDEMBOX

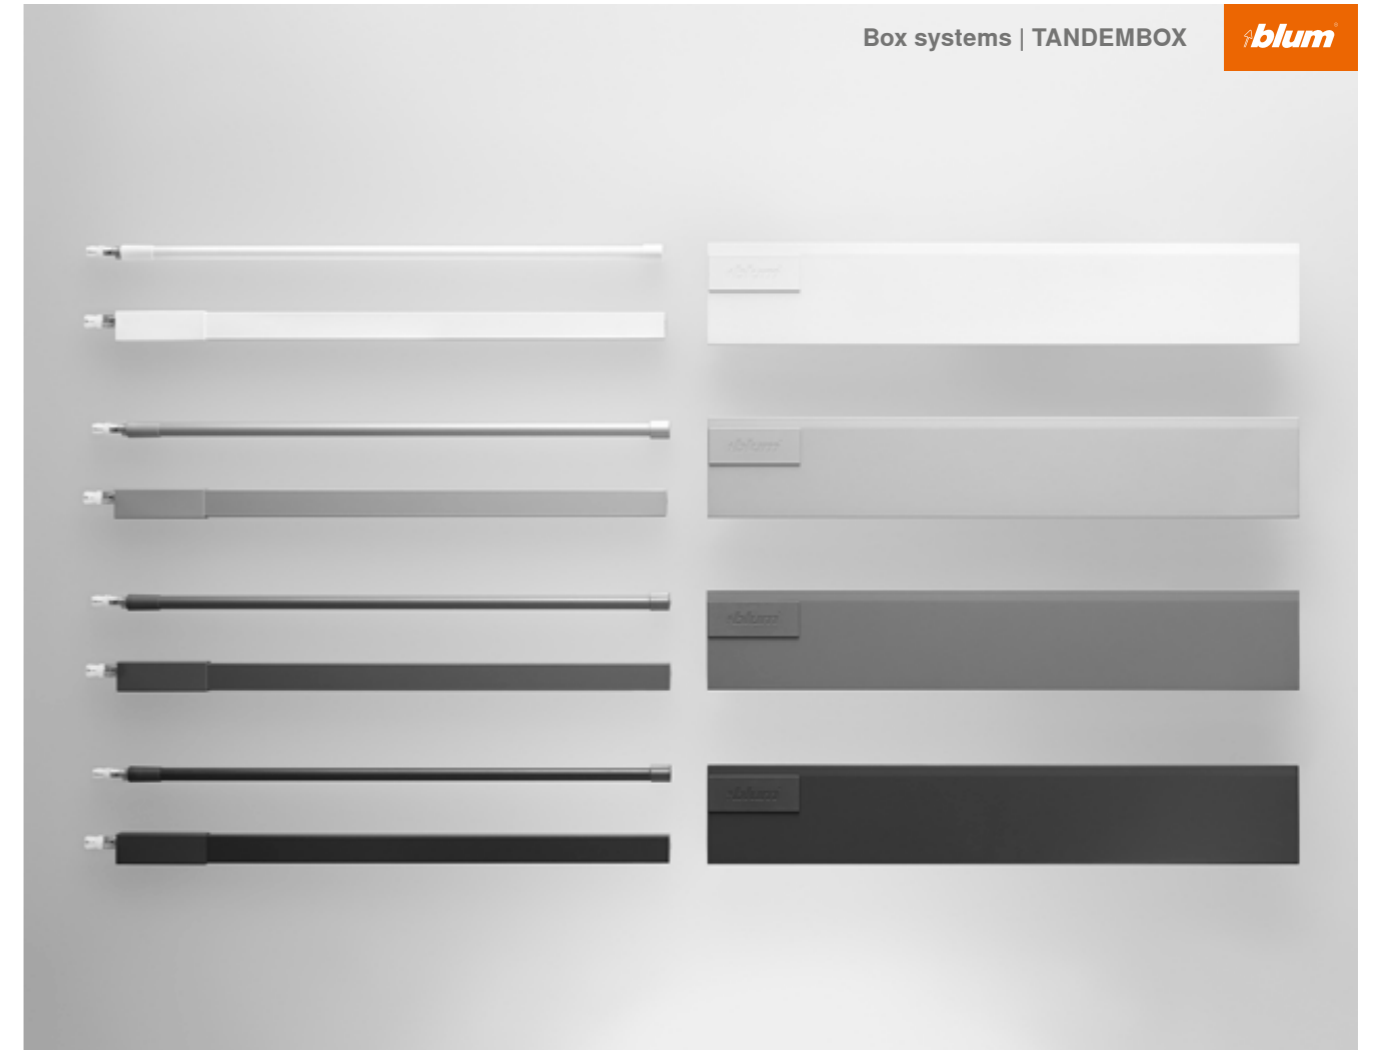

Efficient and simple

We have simplified and added new possibilities to the range for our industrial customers. You can choose between an A and T design and combine accessories as you wish. All gallery options and cover caps are now available in the four standard colours. And our new BOXSIDE allows you to turn a pull-out with a round gallery into a drawer with closed sides within seconds. What is more, the new front fixing, which is identical for all inner pull-outs, makes assembly even easier.

A and T design

First, choose your drawer side: You can select between an A or T design. Both designs are compatible with all accessories and can be combined as you wish.

Available in all standard colours

The round gallery and its cover caps are now also available in all four standard colours.

New! BOXSIDE for round galleries

Upgrade for pull-outs with a round gallery: Just push back the cover cap of the round gallery and insert BOXSIDE – that's it. You've got a TANDEMBOX pull-out.

Round gallery

Now available in silk white, white aluminium, titanium grey and orion grey with matching cover caps.

Rectangular gallery

A coordinated colour scheme is also available for rectangular galleries.

Rectangular gallery and design element

Simply insert a design element and create a pull-out with closed sides in seconds.

New front fixing

No matter whether round or rectangular gallery, the new front fixing is suitable for all inner pull-outs. So you can use the same front fixing for all inner pull-outs regardless of the accessories you choose for differentiation. Here we have a round gallery with BOXSIDE.

MERIVOBX

Let's create –

The box platform for your ideas

Offering variety has never been so easy. This platform makes it incredibly simple to manufacture and assemble drawers and pull-outs to meet every demand. Experience maximum functionality combined with stunning design. In short, MERIVOBX makes your ideas and those of your customers happen. Get a head start and get ready for the challenges that lie ahead.

PLATFORM

DESIGN

FUNCTIONALITY

ASSEMBLY

Platform

It takes just a few components to create your own broad range. And your furniture manufacturing processes become even more efficient at the same time! Diverse and yet simple.

Functionality

MERIVOBX will inspire your customers for the lifetime of the furniture. The newly developed runner concept delivers extremely smooth running action and high load bearing capacity coupled with a feather-light glide and enhanced stability.

Design

MERIVOBX boasts straight lines and a striking look. Create your own diverse and unmistakable range of furniture! Modern minimalism meets distinctive design.

Assembly

A well-thought-out concept. No matter which model you opt for, assembly is always simple and adjustment always the same. It is extremely easy to achieve precise results.

MERIVOBX modular with BOXCAP
Experts consistently opt for metal. It accentuates the clear cut design.

MERIVOBX modular with gallery and design element
Countless combination options provide a high level of design freedom.

MERIVOBX modular with gallery
The high fronted pull-out option with a gallery is a real eye-catcher and a top-quality entry-level solution.

MERIVOBX pure

The monolithic high fronted pull-out option impresses with large, continuous surfaces to create a supreme drawer side design.

Box systems | MERIVOBX

MERIVOBX modular with BOXCOVER

Glass design elements capture the light and create a classy impression. Here in drawer height M.

MERIVOBX modular with BOXCOVER

myLEGRABOX

Turn your inspiration into a reality

Transform living space into design space. Think design: outside and in. Get new ideas for innovative furniture concepts from all over the world and turn your inspiration into unique furniture. No matter what inspires you – LEGRABOX gives you endless possibilities to channel inspiration into design. What is more, you can make your furniture as simple or bespoke as you wish. Join us on a journey of discovery!

LEGRABOX individual

The ultimate in individualisation: Design to your heart's content. Mix colours and materials, use printing, laser-engraving and embossing options to add customised designs and create unique furniture that delights your customers.

LEGRABOX special edition

The special collection: Incredible drawer side looks based on the new colour, carbon black matt and stunning material mixes with anti-fingerprint stainless steel, a special 3D carbon look or a noble rust structured finish.

LEGRABOX pure / free

The basis: LEGRABOX pure and LEGRABOX free offer a selection of noble matt colours and a premium look in anti-fingerprint stainless steel.

Branding element

The branding element enables customisation across all LEGRABOX design options.

LEGRABOX individual

Front in lustrous brass and printed drawer sides in carbon black matt produce a striking contrast.

LEGRABOX special edition

Noble rust on the outside, carbon black matt on the inside – this drawer side colour mix makes the drawer a double eye-catcher.

**LEGRABOX free**

Drawer sides in orion grey matt combined with smoked glass design elements allow the drawer contents to shimmer through. The silver branding element creates additional visual impact.

**LEGRABOX individual**

The embossed drawer side in orion grey matt harmonises beautifully with both dark and light colours. Enjoy the freedom to combine different styles.

Runner systems

Quality steel for your wooden design ideas

If you make wooden drawers, you'll be interested in top quality runners by Blum. Be it MOVENTO or TANDEM – we have the right runner system for every requirement so there are no limits to your ideas. We have recently made additions to our range, giving you even more possibilities for customised applications. Our concealed TANDEM runner system is now also available with 7/8 extension and as a single extension with integrated TIP-ON.

NEW to the TANDEM range

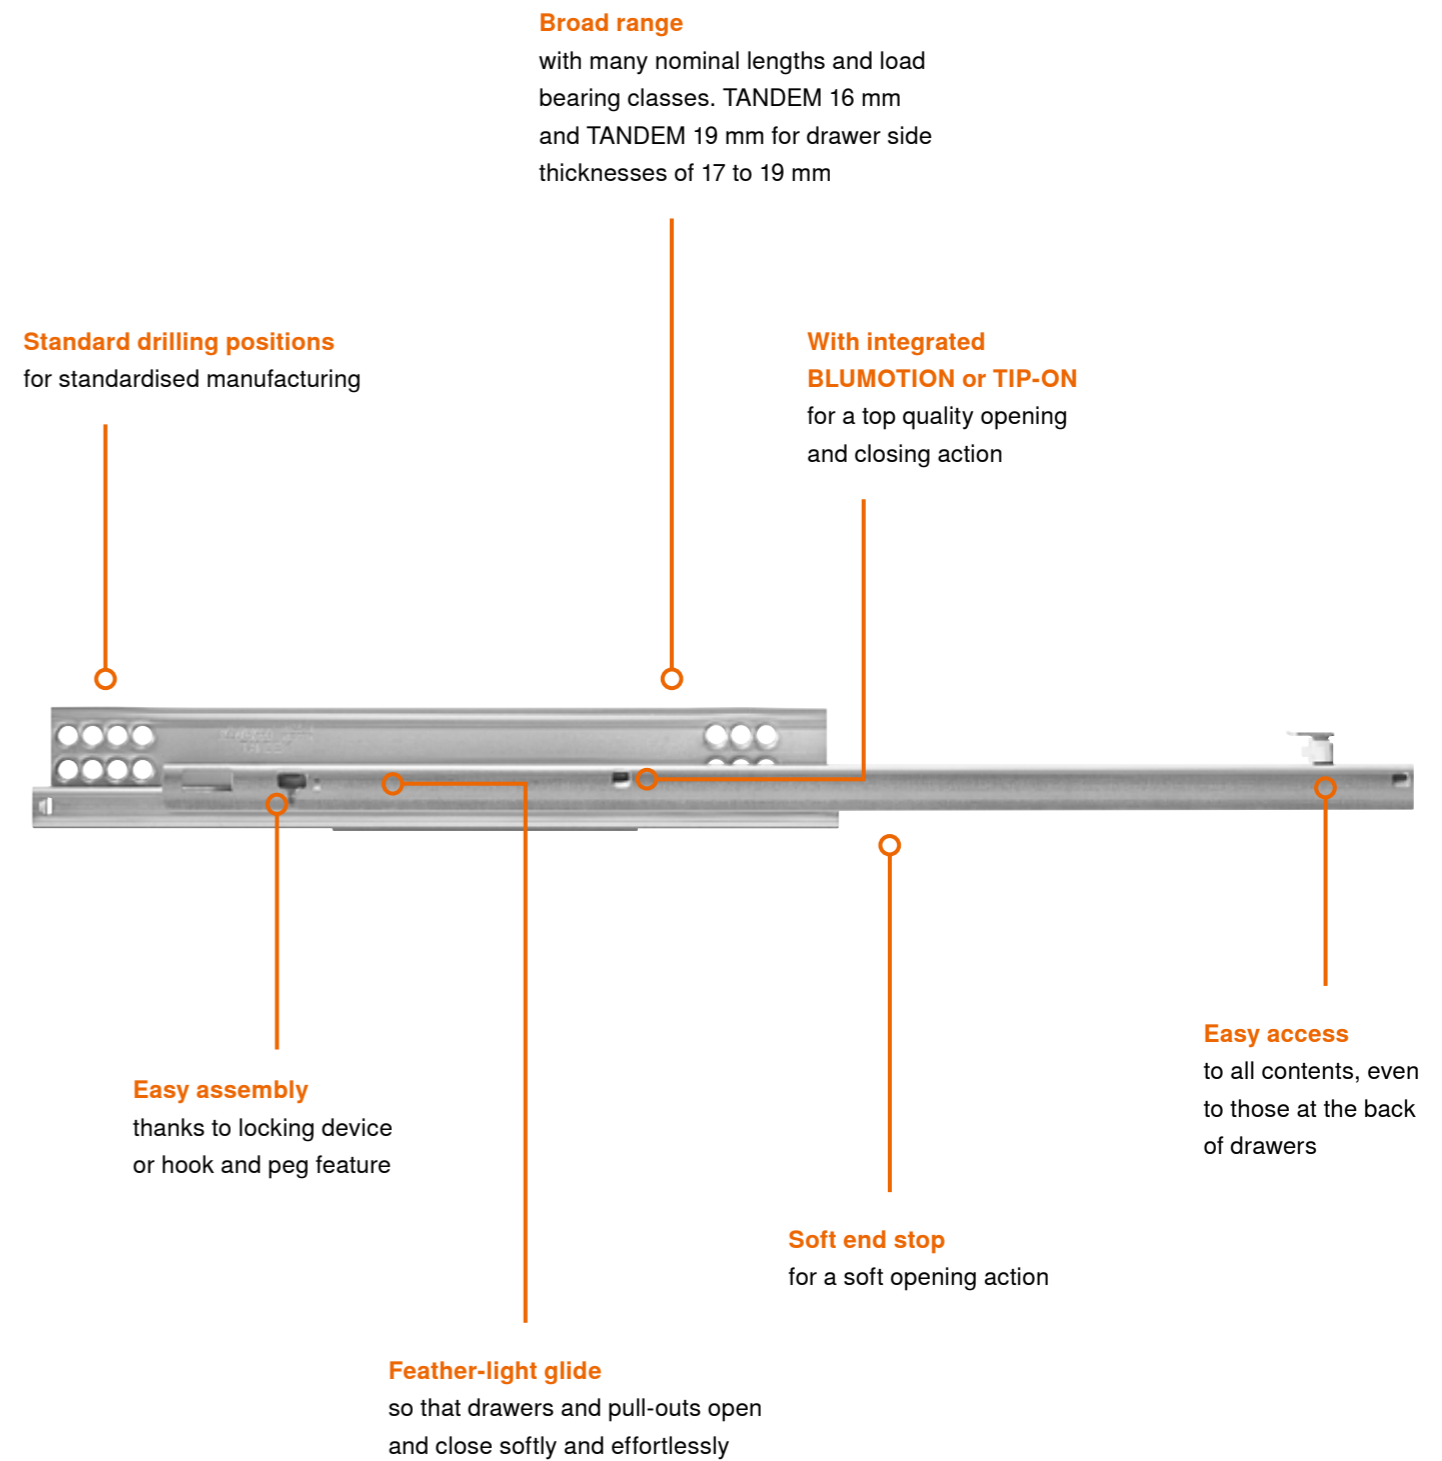

We at Blum would like to meet your needs and those of your customers in the best possible way. Not just today, but also tomorrow. That is why we are continuously optimising and extending the TANDEM range. For example, we now offer TANDEM with ergonomic 7/8 extension and an economical single extension runner with integrated TIP-ON motion technology.

Single extension
7/8
Full extension

7/8

Economical 7/8 extension for ergonomic access

Pull-outs near the floor

TANDEM is stable and has very good sag values. It is therefore suitable for pull-outs that are near the floor as well as extra wide, high and deep pull-outs.

Easy assembly

You can opt between a hook and peg feature and a locking device.

Integrated motion technology

Drawers open with a single touch thanks to TIP-ON. TIP-ON is integrated in the TANDEM single extension runner. To close, gently press shut.

REVEGO duo

Double door application

REVEGO uno

Single door application

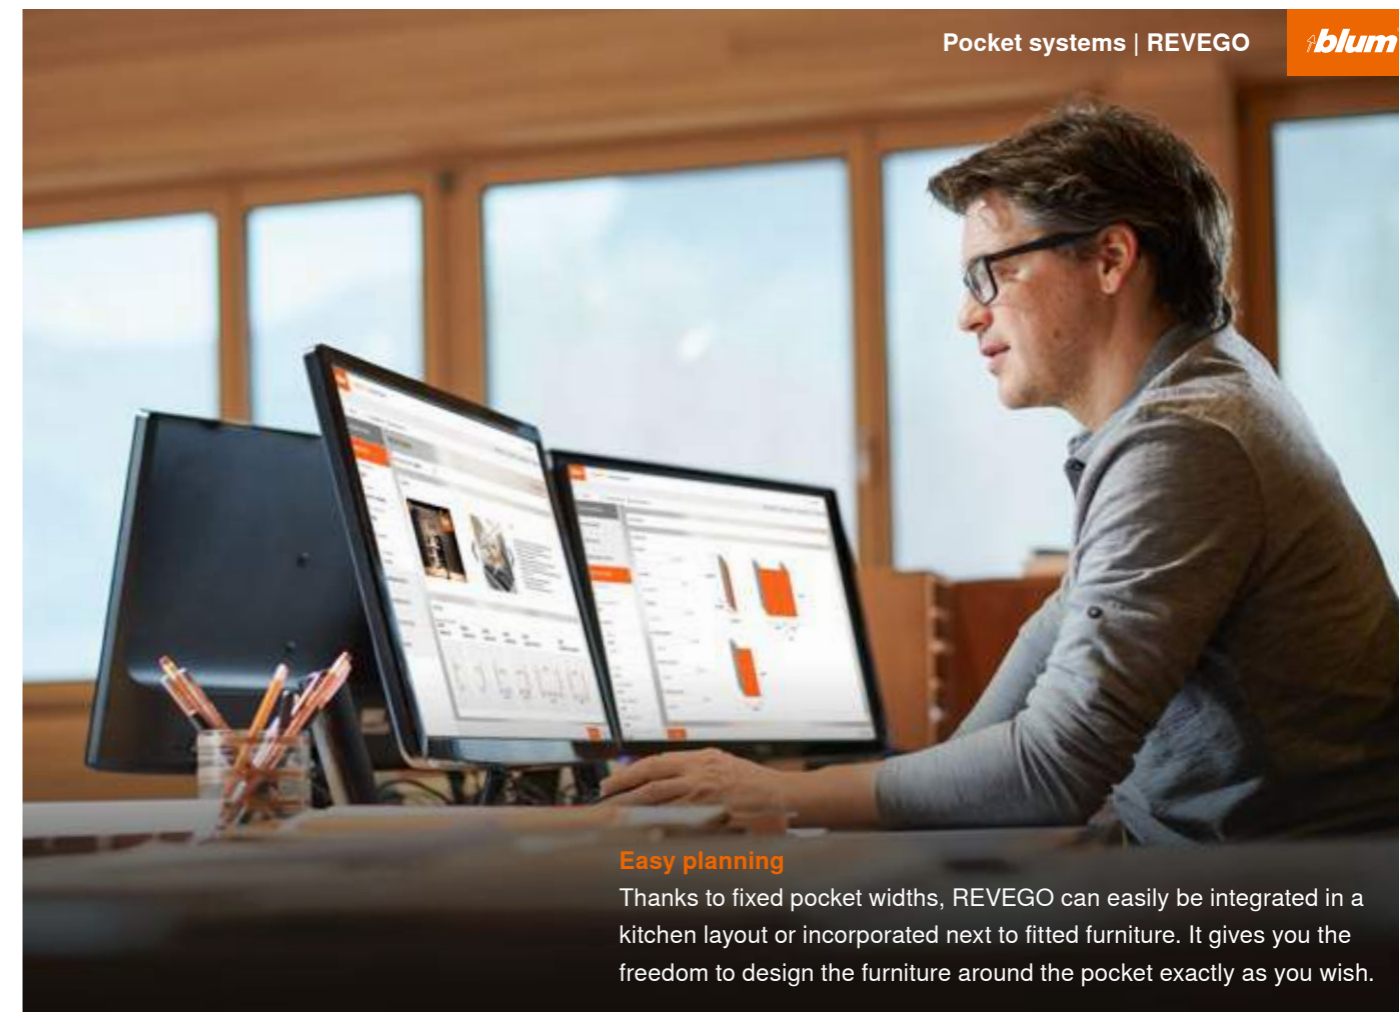

REVEGO
New pocket systems

More and more people are merging their kitchen, dining, living and working space. How best can this trend be implemented in modern living concepts? Our solution is a new product category called pocket systems. Single or double door applications can be used to “magic” away a kitchen or entire living areas. REVEGO opens up completely new design possibilities for small and large rooms.

Our secret: The technology is completely integrated in a special narrow cabinet, the pocket. Your benefits: Simple planning, easy installation and more efficiency and cost effectiveness thanks to pre-assembly and simplified processes.

Easy assembly

Erect pockets, align with the furniture you would like to close off and attach, install horizontal track and doors, align gaps – that's it.

Easy planning

Thanks to fixed pocket widths, REVEGO can easily be integrated in a kitchen layout or incorporated next to fitted furniture. It gives you the freedom to design the furniture around the pocket exactly as you wish.

Efficient manufacturing

Thanks to the well-thought-out pocket construction, REVEGO (and all its integrated fittings) can be pre-assembled in your workshop and then easily transported to site.

With or without handles
Easy opening and closing with and without handles thanks to TIP-ON.

Single and double door applications
Applications can be used independently and combined as you wish. Full overlay fronts conceal the pocket completely. Fronts glide out of the pocket at a single touch.

Flush and projecting fronts

Different nominal lengths allow you to create bespoke solutions and adapt applications to the installation situation.

Flush or projecting fronts depending on installation depth and front width

Plinth options

Can be implemented with or without a base construction.

Application options

REVEGO is the answer if you would like to quickly conceal functional furniture or close off additional workspaces when required.

Dark surfaces

It's not just design, it's style

When we develop products we take inspiration from the latest trends, like the new interior design trend towards dark surfaces. Cabinets and fronts in muted colours and dark accents in light coloured furniture create a stunning effect. Our dark fittings for wall cabinets, doors and pull-outs give you greater scope for designing fine furniture without compromising on form.

Hinge systems

Our hinges in onyx black discreetly complement dark furniture and create visual impact in light coloured furniture.

Box systems

Lush terra black matt or noble carbon black matt make our box systems real eye-catchers.

Lift systems

AVENTOS HK top is also available in dark colours. For harmonious wall cabinet interiors.

Power integrated furniture

New technologies, new possibilities

We believe that furniture of the future will be a "home" for smart devices. To this end, we will offer the infrastructure to supply power to your furniture. This will make furniture the basis for future applications, ideas and visions.

Digital technology

Fit for the future through standardisation

USB-C is becoming the most commonly used type of interface for electronic devices. We anticipate that this interface will become the standard on the market for future applications. Furniture will be a new “home” for electronic devices. And gadgets will be supplied with power directly where they are kept.

Tailored to your needs

Functional: Lighting makes the contents of pull-outs visible. Integrate lighting into your furniture with ease – using a well-thought-out infrastructure.

Emotional: Use background lighting to create ambience in any room. The decorative lighting functions are easy to operate.

Blum Services

Our focus is on your needs

We support your daily operations and work with you to solve challenges. Be inspired by the combination of our top quality products and services tailored to your needs. No matter whether cabinet makers, industrial customers or distributors, everyone should benefit from our services and assembly devices. We would like you to be able to concentrate on your core competencies and have more time for your customers.

Services

Services for distributors

The supply of products alone is not enough. We don't just want to satisfy you as a customer – we want to inspire you with our products and services. Our services are designed to make it easy for you to integrate our products in your processes and optimise them. In addition, we offer services that create added value for your customers. This will make it even easier for your customers to buy from you.

Advantages for you:

- Save time preparing information about your product range
- Make it easier for your customers to select and order products
- Improve customer satisfaction with fewer complaints

More time for you to take care of your customers.

Services for cabinet makers

Good services are there when you need them. As a reliable partner, we offer you services and practical assembly devices that complement our products and support you along every step of your manufacturing process. We will help you transform your ideas into fine furniture.

Advantages for you:

- Online and personal support
- Services for you as a cabinet maker and entrepreneur
- Top quality furniture in less time

More time for you to impress with your craftsmanship.

Marketing Media Library

Use our high-resolution images, videos and brochures for your promotion campaigns and gain inspiration – completely free of charge and around the clock.

Product and Cabinet Configurator

Plan, configure and save your projects online with ease – with our free Product and Cabinet Configurator. Create up-to-date parts lists for your offers to customers.

CAD/CAM Data Service

Our CAD/CAM Data Service also provides comprehensive data for your software. You will find an overview of our interface partners on our homepage.

Distributor interface

Transfer the parts list produced by our Product and Cabinet Configurator directly to the online shops of selected distributors and simply save your projects under “My projects”.

MINIPRESS with EASYSTICK

Our configurators provide you with production drawings or the BXF format so that you can transfer your planning results to MINIPRESS with EASYSTICK. We also offer templates and assembly devices to support you with manufacturing.

EASY ASSEMBLY app

Use our EASY ASSEMBLY app to install and adjust our fittings quickly and efficiently. The app contains assembly instructions and videos for all our products.

Personal consultation

We provide personal after-sale support. Your contact at Blum will be happy to answer any questions you might have about our products and services.

Services for the furniture industry

The furniture industry has to do a balancing act between standardisation and differentiation. But introducing new products need not reduce the efficiency of your manufacturing processes. What you need are products and services that smoothly fit into your existing operations.

Advantages for you:

- Optimised logistics
- More transparency and flexibility
- Economical manufacturing
- Fast implementation of adjustments to the product range

More time for you to develop new furniture ideas.

Implement practical furniture ideas

Our worldwide kitchen surveys show us the needs of end users. Our findings are innovation drivers for practical furniture. Together with you we will find a perfect solution and develop new concepts.

Marketing support

Make the most of our well-thought-out storage space concepts to ensure that your customers will enjoy their furniture for many years to come. We will help you produce your own marketing documentation and support you with product training.

Efficient ordering

We offer solutions and tools for efficient and error free order fulfilment. If you want to optimise demand planning and order processing, we are happy to support you with our analysis tools and provide personal advice.

Optimised manufacturing

We work hard to ensure that our products can be smoothly integrated into your processes. Our offering not only includes advice on the optimal design of workplaces, but also well-thought-out assembly devices for efficient manufacturing.

Efficient and ecological logistics

Our experts make sure that products are delivered to you on time and in an environmentally-friendly way. Together we will examine how our fittings can best be integrated into your product range while taking ecological aspects into consideration.

EASY ASSEMBLY app

Our EASY ASSEMBLY app is available worldwide, around the clock, and is designed to help you assemble and install our products with precision. Independent installers can also benefit from the app.

Personal support

We are always there for you. Our technical support team speaks many languages and is available worldwide. We will answer your inquiries – personally by phone, email or chat.

moving ideas

We will continue to move ideas forward for you. Driven by curiosity to research into needs and develop the right products and solutions for you. So that we can jointly realise our vision of a better quality of living, every day.
